ROSEAU COUNTY

County History

Roseau County's origins trace back to 1888, when the lands currently compromising the county were first surveyed. The territory, located in neighboring Kittson County, was then named "Jadis" for Edward W. Jadis, an English-born agent for Sprague Lumber Company of Winnipeg, Canada and Kittson County Auditor. Jadis befriended settlers and Native Americans in this area. This land remained a part of Kittson County until December 31, 1894, when Governor Knute Nelson made a historic proclamation.

The proclamation took the 30 eastern townships of Kittson County and transformed them into Roseau County. A second proclamation by Governor David M. Clough on February 11, 1896 added 15 townships to eastern Roseau County from Beltrami County. With more territory and citizens, Roseau County was now ready to create its own unique identity and way of life.

Roseau County was named from Roseau Lake and Roseau River. More specifically, the name comes from French traders who, while traveling through the river area, found it to be an area of "rushes and reeds." The word "Roseau" is a French term meaning "reed," a very coarse grass that is common in the shallow edges of lakes throughout the prairie regions of Minnesota and Manitoba. The great abundance of reed along the shorelines grows in some places to heights of eight to twelve feet tall.

With a current population of about 16,000, Roseau County continues to thrive in industries such as durable goods manufacturing, services & field crops, and state & local government.

E-911 Addressing System

Roseau County's Enhanced 911 rural addressing system is based on a grid originating in the southwest corner of the county. Streets run east and west and begin with 100th St on the south county line. Avenues run north and south and begin with 100th Av on the west county line.

Street and avenue numbers increase by 10 for each mile traveled away from the address grid origination point.

Individual addresses on streets begin at 1000 at the west county line and increase by 1000 for every mile travelled east. Indivdual addresses on avenues begin at 1000 at the south county line and increase by 1000 for every mile travelled north.

Homes along the south and east sides of roads have even-numbered addresses. Homes along the north and west sides of roads have odd-numbered addresses.

Incorporated cities within the county maintain their own addressing systems and are responsible for address assignment within their respective city limits.
