MEETING NOTICE
The City of Cedar Rapids Historic Preservation Commission will meet at:

4:30 P.M.
Thursday, March 14, 2013
at
Police Substation
1501 1st Avenue SE, Cedar Rapids, Iowa

AGENDA

Call Meeting to Order
1. Approve Meeting Minutes
2. Action Items
   a. NEW Demolition applications
      i. 1015 3rd Street SE – Private Property
      ii. 86 14th Avenue SW – Private Property
   b. COA applications
      i. 324 14th Street SE – Full rehabilitation (Interior and exterior)
      ii. 357 16th Street SE – Replace wood siding with vinyl siding
3. New Business
   a. Kirkwood Historic Preservation Curriculum Plan
   b. GIS Database for Historic Properties Inventory
   c. Section 106 review - 101 2nd Street SE
   d. Citywide Reconnaissance Survey
4. Old Business
   a. Demolition Applications UNDER REVIEW
      i. 519 4th Avenue SE – March 16, 2013
      ii. 411 6th Street SE – March 16, 2013
   b. Final update on City properties past 60-day review period
   c. Preservation Showcase
   d. MOA/LOA Updates
5. Adjournment

FUTURE MEETINGS

Items for future agendas:
 a) Appointment of Secretary
 b) Review of Chapter 18 Demolition Ordinance
 c) 2012-2013 work plan update following Development Committee review
 d) Preservation Showcase Publicity
 e) Historic Districts Mailing
 f) Farmstead Foods Project Outreach

3/12/2013
Historic Preservation Commission Agenda Item Cover Sheet

Meeting Date: March 14, 2013

Property Location: 1015 3rd Street SE
Property Owner/Representative: William Harnish
Year Built: 1906

Description of Agenda Item: ☒ Demolition Application ☐ COA ☐ Other

Background and Previous HPC Action: None.

Historic Status: Contributing ☒ Not Contributing ☐ Unknown ☐ N/A ☐

Explanation (if necessary): This property was included in the Bohemian Commercial Historic District (boundary increase) nomination to the National Register of Historic Places. It is listed as one of 43 contributing structures out of 68 total properties in the district.

If contributing, which criteria is met:
☐ Associated with significant historical events
☐ Associated with significant lives of person
☒ Signifies distinctive architectural character/era
☐ Associated with lives of persons significant in our past
☐ Archaeologically significant

Other Action by City: Yes ☐ No ☒ N/A ☐

Explanation (if necessary):

Reason and Future Plans:
• Salvage is not an option for the property since the interior of the building has been completely stripped down to the studs, with flooring removed.
• The property owner is seeking to build a new chapel on the site. Costs of rehabilitation exceed the costs of restoration, and the existing building is not conducive to the type of business that the property owner would like to operate on the site.

Time Sensitivity:
DEMOLITION PERMIT APPLICATION

Address of Demolition: 1015 3RD ST. S.E.  CEDAR RAPIDS, IA 52403

Approximate Age of Structure: 

Year Built: 1900

GPN: 14281-88012-00000

Reason: (optional) Build new Chapel

Future Plans: (optional)

Historic Preservation Commission Agenda Item Cover Sheet

Meeting Date: March 14, 2013

Property Location: 86 14th Avenue SW
Property Owner/Representative: Penford Products Company
Year Built: 1920

Description of Agenda Item: ☒ Demolition Application ☐ COA ☐ Other

Background and Previous HPC Action: None.

Historic Status: Eligible ☐ Not Eligible ☒ Unknown ☐ N/A ☐

Explanation (if necessary):
This property was included in a reconnaissance survey performed by Louis Berger in 2009 and was found to be ineligible for listing in the National Register of Historic Places.

If eligible, which criteria is met:
☐ Associated with significant historical events
☐ Associated with significant lives of person
☐ Signifies distinctive architectural character/era
☐ Associated with lives of persons significant in our past
☐ Archaeologically significant

Other Action by City: Yes ☐ No ☒ N/A ☐

Explanation (if necessary):

Reason and Future Plans:
- The contractor indicated he would check with Penford regarding the ability to perform salvage on the property. An update on the status of this request will be given at the meeting.
- This property will be used for future expansions and the development of business operations between Penford and partner companies in the future.

Address of Property where work is to be done:
324 14th Street SE, Cedar Rapids, Iowa

Project type: House ☒, Garage ☐, Shed ☐, Fence ☐, Addition ☐, other ☐

Project description: With $85,000 of HOME funds, Affordable Housing Network, Inc. will acquire & fully rehabilitate the single family home located at 324 14th Street SE in Cedar Rapids as a rental unit for a low-income household.

Location: Describe where (what part of building, or where on property) work will be done: Exterior & interior - full rehab.

Materials: Type and design to be used: AHNI will use like materials for most of the rehab. AHNI prefers to use weather metal clad windows, steel exterior doors, narrow gauge sheetrock & new tub/shower surround. Please see attached scope of work for details & justification.

Estimates required: If you will not be using the same type of materials as already used on the building, then you must obtain two estimates using the existing material(s) and two estimates using the new material(s).

Samples: Applicant must bring a sample of the material(s) to HPC meeting if a COA is required.

Applicant’s signature: Carey Houckins-Witt

Masonite Steel doors feature high-definition decorative panel profiles that closely replicate the appearance of a high-end wood door with the ultimate in security. They truly make a statement with the addition of Masonite's Glass inserts for a grand entrance.

1. High-Definition Panel Profile
   - creates excellent shadow lines and distinct panel designs

2. Internal Blocking
   - lock area is reinforced to provide solid mounting surface

3. Two Finish Options
   - Masonite® HD features a baked-on primer for a more durable finish
   - Sta-Tru® HD has a prefinished white surface (no initial finishing required on door panel)

4. Rot-Resistant Bottom Rail
   - high-performance composite material is utilized on all bottom rails

5. Interlocking Steel-Edge
   - has six 90° steel bends in each edge to ensure stability and resist warping

6. Square-Edge Design
   - wood door appearance

7. Vinyl Extrusion
   - locks facings together and provides an insulated thermal barrier

8. Steel Reinforcements
   - hinges are flush mounted into steel reinforcements to help prevent hinge failure
   - 90-minute fire label available (opaque doors only)
   - 90-minute steel edge doors also available with optional panic prep blocking (see page 100 for blocking details)

9. Engineered Construction
   - finger-jointed hinge stile
   - laminated lumber lock stile

10. Interlocking Design
    - grooved stiles add strength and structural rigidity
    - steel facings wrap over stiles with a "J" bend
    - 20-minute fire label available (opaque doors only)

MID: Mid-Am HD Steel Entry Doors

Limited Lifetime Warranty (Exclusive MID + AM Warranty)
Refer to www.MidAmBuilding.com for further details
We take great care to ensure color standards, however, variations in graining, wood hues, and light sources will affect finishing. Printed representations are not meant for color matching purposes.
Heavy Duty Protection You Can Count On
Sash exteriors feature low-maintenance, heavy-duty extruded aluminum cladding that resists denting, dimpling, fading and chalking far better than thinner roll-formed aluminum exteriors found on many other brands of windows.

Weather Stripping
Both sash feature double weather stripping that provides a strong, positive seal for greater resistance to air and water infiltration.

Everything You Need To Get Started
Tilt sash replacement kits include two sash with sash lock and keeper, two jamb liners with calibrated balances, eight jamb liner brackets with stainless steel screws, two vinyl sash stops and a head parting stop and weather strip.

Tilt Sash Replacement Kits
Tilt Sash Replacement Kits from Weather Shield® can breathe new life into older windows with standard and custom sizes that precisely fit existing window frames. These sash replacement kits are easy to install with minimal disturbance to the surrounding wall trim, wallpaper or paint. Plus, their unique tilt-in sash design allows for easier cleaning of both glass surfaces from inside your home. That's something that's not often seen on sash replacement kits offered by other manufacturers.

INSTALLATION INSTRUCTIONS

**STEP 1:** Remove the old sash by taking out the inside stop mouldings from the side jams using a pry bar or putty knife.

**STEP 2:** Cut out all cords and weights. Remove the bottom sash first, then the top sash.

**STEP 3:** Prepare the frame by positioning the brackets for the vinyl jamb liner about 4" from the top and bottom. Secure in place.

**STEP 4:** Install the vinyl jamb liner by placing the foam gasket at the top of each liner, place against brackets and snap in.

**STEP 5:** Install the sash by holding the top sash at 90 degrees and level with the cains in the vinyl jamb liner. Engage the corner pins and tilt the sash upright in the vinyl track while sliding the sash down. Repeat with the bottom sash.

More detailed instructions are included with each Tilt Sash Replacement Kit.
In the tradition of top performers, the Silver Series features a mechanical interlock at one of the most critical areas of the window…where the sashes meet.

From: Brad Larson, Planner
Subject: Options to Funds a Historic Preservation Program
Date: December 18, 2012

This memo is to provide the Historic Preservation Commission with background on a request to allocate funds from either FEMA MOAs or the State LOA to fund a Historic Preservation Program at Kirkwood Community College. This would be the first Historic Preservation Program in the State of Iowa. Support from the HPC is required before moving the request forward to FEMA or the State.

Background:
In 2012 the City began to meet with representatives from Save CR Heritage to discuss ways to encourage an ethic of historic preservation in the community. The City and Save CR Heritage researched how communities were successful at creating a sustaining culture of preservation. One of the most evident links successful communities had was an educational institution nearby that offered a curriculum in historic preservation. Currently, Iowa does not have a college or university that offers classes in historic preservation.

Save CR Heritage and the City met with representatives of Kirkwood’s Continuing Education Department to discuss creating curriculum focused on preservation. Kirkwood was open to the idea and provided a budget required to start a new program. Kirkwood does not have additional budget to create and market a new program.

Kirkwood Program:
Attached are documents that provide more detail for Kirkwood’s program. The Kirkwood Historic Preservation Program is offering an 8 class curriculum that would provide a certificate for each class completed and an overall certificate for completing the entire program. This program will target trade professionals that do the actual work, but everyday homeowners may be able to take some of the classes as well. Below is a summary of the classes.

1. Architectural Investigation (pre-requisite) 12 Hours
2. Historic Masonry Buildings 16 Hours
3. Maintaining the Exterior of Historic Buildings 16 Hours
4. Weatherization and Historic Structures 12 Hours
5. Repairing Historic Plaster Walls and Ceilings 20 Hours
6. Preservation and Repair of Stained Glass 8 Hours
7. The Repair of Historic Wooden Windows 20 Hours
8. Lead Safe Renovator Training 8 Hours

TOTAL: 112 Hours
Budget:  
Most of the cost to start the Kirkwood Preservation Program is for the development of the curriculum, which needs to be done by a professional. Because this will be a continuing education program, the time to develop and start the program will be less than one year. At the suggestion of the City and Save CR Heritage, Kirkwood has also included budget items for marketing and scholarships. Below is a draft summary of the budget. A finalized budget will be presented at the February 28 meeting.

Options:  
The only available funds for assisting Kirkwood with this program would come from the MOA and LOA projects that have not been started. Below are several options for funding, if the HPC decides to recommend moving forward.

**Option 1:**  
Reallocate funds from the Comprehensive Historic Preservation Plan project.

*Pros:*  
- There are enough funds in the project to fund Kirkwood’s program.
- There will be funds left over to re-allocate to a smaller project.
- The City is completing what is normally included in a comprehensive historic preservation plan and more in a shorter than normal time frame due to the MOAs and LOA. Staff has provided a matrix for comparison.

*Cons:*  
- The Comprehensive Preservation Plan was a popular project during public feedback.

**Option 2:**  
Reallocate funds from the project to nominate 12 properties to the National Register of Historic Places.

*Pros:*  
- There are enough funds in the project to fund Kirkwood’s program.
- Other buildings will be nominated through the MOA intensive surveys and nominations.

*Cons:*  
- The HPC could use the 12 nominations to promote their “Diamond in the Rough” list.
- The HPC could use the 12 nomination to promote historic preservation in the Community. For example, take nominations from the community.
- Waiting for a response from the State to see if moving these funds is a possibility.

**Option 3:**  
Reallocate funds from a combination of Historic Structure Report projects.
**Pros:**
- There are enough funds in the project to fund Kirkwood’s program.
- These projects have no physical or financial benefit, they are only informational.
- There are multiple projects to choose from.

**Cons:**
- There will some of the 7 structures will not receive a Historic Structure Report, which will provide information on potentially rehabbing their building.
- Waiting response from the State to see if moving these funds is a possibility.

**Option 4:**
Do not recommend moving forward with a Kirkwood Historic Preservation Program.

**Pros:**
- All MOA or LOA projects will remain funded

**Cons:**
- There will continue to be no historic preservation curriculum in the State of Iowa
- Preservation stakeholders will need to find another way to build the ethic of historic preservation in Iowa.

Architectural Investigation

This course addresses the often complex investigative process in broad, easy-to-understand terminology. The logical sequence of planning, investigation and analysis presented in this course is applicable to all buildings, geographic locations, periods, and construction types. It is neither a "how to" nor an exhaustive study on techniques or methodologies; rather, it serves to underscore the need for meticulous planning prior to work on irreplaceable cultural resources.

Course Topics:

Determining the Purpose of Investigation  
Investigators and Investigative Skills  
Studying the Fabric of the Historic Building  
Conducting the Architectural Investigation  
Keeping a Responsible Record

Course Length: 12 hours
Historic Masonry Buildings

This course will provide general guidance on appropriate materials and methods for repointing historic masonry buildings and it is intended to benefit building owners, architects, and contractors. This course should serve as a guide to prepare specifications for repointing historic masonry buildings. It should also help develop sensitivity to the particular needs of historic masonry, and to assist historic building owners in working cooperatively with architects, architectural conservators and historic preservation consultants, and contractors. Although specifically intended for historic buildings, this course is appropriate for other masonry buildings as well.

Course Topics:

- Historical Background
- Identifying the Problem before Repointing
- Finding an Appropriate Mortar Match
- Properties of Mortar
- Mortar Analysis
- Components of Mortar
- Mortar Type and Mix
- Budgeting and Scheduling
- Contractor Selection
- Execution of the Work
- Visually Examining the Mortar and the Masonry Units

Course length: 16 Hours
Maintaining the Exterior of Historic Buildings

As soon as a building is constructed, restored, or rehabilitated, physical care is needed to slow the natural process of deterioration. An older building has already experienced years of normal weathering and may have suffered from neglect or inappropriate work as well. This course is designed for those responsible for the care of historic buildings, including owners, property administrators, in-house maintenance staff, volunteers, architects, and maintenance contractors. The course will cover the benefits of regular inspections, monitoring, and seasonal maintenance work; provides general guidance on maintenance treatments for historic building exteriors; and emphasizes the importance of keeping a written record of completed work.

Course Topics:

Building Materials and Construction Details
Building Components
   Roofs/Chimneys
   Exterior Walls
   Openings
   Projections
   Foundations and Perimeter Grade
   Sealants and Caulks
Maintenance Plan, Schedules and Inspection
Worker Safety

Course length: 16 Hours
Weatherization and Historic Structures

Weatherization is the first step towards a more comfortable, energy efficient building. Participants will learn how to reduce energy costs with practical solutions for weatherizing historic structures. Understanding how air, heat, and moisture moves in a typical structure will be covered. Participants will learn where to look for and how to locate air infiltration into buildings and how to seal any leaks found. Various weatherization products and their proper applications will be discussed including caulk, foam, and weather stripping. Instructor will adapt content to knowledge level and interest of students. The students will interact with the instructor for the purpose of classroom discussion.

**Course Topics:**

- Identify reasons to seal homes from air infiltration.
- How air, moisture and heat move in a structure.
- Identify the building envelope.
- Identify the difference between air infiltration and ventilation.
- Identify where and how to find air leaks in a typical home.
- Identify where and how to apply various types of caulks and foam products to seal air leaks.
- Identify where and how to install various types of weather stripping around doors and windows.
- Describe and discuss ways to reduce energy loss through a fireplace.
- Describe and discuss methods to seal and insulate HVAC ducts.
- Describe and discuss methods to insulate water pipes and water heaters. Identify resources available to find rebates and tax incentives for energy efficient improvements to your home.

**Course length: 12 Hours**
Repairing Historic Plaster Walls and Ceilings

This course will stress repairs using wet plaster, and traditional materials and techniques that will best assist the preservation of historic plaster walls and ceilings—and their appearance. Drywall repairs will also be covered here.

Course Topics:

- Historical Background
- Common Plaster Problems
- Repairing Historic Plaster
- When Damaged Plaster Cannot be Repaired
- Patching Materials
- Drywall Repair

Course length: 20 Hours
Preservation and Repair of Stained Glass

This course gives a short history of stained and leaded glass in America. It also surveys basic preservation and documentation issues facing owners of buildings with leaded glass. It addresses common causes of deterioration and presents repair, restoration, and protection options. It does not offer detailed advice on specific work treatments. Glass is one of the most durable, yet fragile building materials. While stained glass windows can last for centuries, as the great cathedrals of Europe attest, they can be instantly destroyed by vandals or by careless workmen. Extreme care must therefore be exercised, even in the most minor work. For this reason, virtually all repair or restoration work undertaken on stained and leaded glass must be done by professionals, whether the feature is a magnificent stained glass window or a clear leaded glass storefront transom.

Course length: 8 Hours
The Repair of Historic Wooden Windows

The windows on many historic buildings are an important aspect of the architectural character of those buildings. Their design, craftsmanship, or other qualities may make them worthy of preservation. This is self-evident for ornamental windows, but it can be equally true where the windows may be the most dominant visual element of an otherwise plain building. Evaluating the significance of these windows and planning for their repair or replacement can be a complex process involving both objective and subjective considerations. The primary emphasis of this course is on the technical issues of planning for the repair of windows including evaluation of their physical condition, techniques of repair, and design considerations when replacement is necessary.

Much of the technical section presents repair techniques as an instructional guide for the do-it-yourselfer. The course material was developed for carpenters; home owners and do-it-yourselfer. But will be useful, however, for the architect, contractor, or developer on large-scale projects. It presents a methodology for approaching the evaluation and repair of existing windows, and considerations for replacement, from which the professional can develop alternatives and specify appropriate materials and procedures.

Course Topics:

Architectural or Historical Significance
Physical Evaluation
Repair Class I: Routine Maintenance
Repair Class II: Stabilization
Repair Class III: Splices and Parts Replacement
Weatherization
Window Replacement

Course length: 20 Hours
Lead Safe Renovator Training

This is a prerequisite class that must be taken prior to any field work. The course can be waived if the student holds a currently valid lead safe card for the Iowa Department of Public Health. A copy of the card must be on file at Kirkwood.

This 8-hour course is for persons who have not previously been trained in “Lead Safe Work Practices.” It concentrates on specific work practices that are lead-safe, and describes prohibited work practices when performing renovations. It demonstrates lead safe work practices including set up, clean up using hands on activities, and it illustrates proper on-the-job training for non-certified workers. It also provides information on Federal and State specific regulations that must be followed as a certified renovator. It provides examples of how to maintain and document required reports. It is a course to prepare renovators for certification. There is an exam that requires a score of 80% or better, once completed participants will be eligible to apply for certification with the Iowa Department of Public Health. Note: This is NOT a course on lead abatement.

Course length: 8 Hours
## Comprehensive Preservation Plan Comparison of Goals:

The following is a list of other communities that have completed a Historic Preservation Plan. Each plan has the following goals in common:

1. **Survey the City**
2. **Nominate eligible properties to the NHRP**
3. **Make people more aware of historic preservation**
4. **Create programs to promote historic preservation projects**
5. **Create a database or map historic resources**
6. **Create better partnerships**

<td>Establish and implement historic preservation objectives for the University of Iowa campus and surrounding neighborhoods.</td>
<td></td>
</tr>
<tr>
<td>Keep register listed properties well maintained.</td>
<td>Develop streetscape design recommendations for the Downtown Historic District and the Andrew Warren District. These streetscape elements would include:</td>
<td>Enhancing and interpreting historic buildings with signage and plaques, public art, walking tours</td>
<td>Avoid demolition, inappropriate alteration, and neglect of Anaheim’s historic resources.</td>
<td>Promote the preservation and maintenance of historically significant commercial and industrial buildings and districts.</td>
<td>Establish and support heritage tourism efforts appropriate to Iowa City’s historic resources and community needs.</td>
<td></td>
</tr>
<tr>
<td>Nominate and designate all known historic resources which meet designation criteria for historic landmarks, historic districts or conservation districts.</td>
<td>Develop a decorative street light program for the City’s historic districts.</td>
<td>Adopting a name for the downtown core or a historic district to solidify identity, such as Pioneer Square in Seattle or the Pearl District in Portland</td>
<td>Retain the historic characteristics of streetscapes, street patterns, and landscape features.</td>
<td>Develop a program that uses available media to publicize historic activities and events, and which provides a framework for periodically developing educational programs or articles.</td>
<td>Conduct regular review and evaluation of historic preservation initiatives by the historic preservation community and integrate preservation objectives in related planning work undertaken by the City of Iowa City.</td>
<td></td>
</tr>
<tr>
<td>Get more public school buildings listed in the local register.</td>
<td>An attempt should be made to develop a neighborhood association to serve as an advocacy group with a focus on historic preservation and enhancement.</td>
<td>Working with appropriate partners to develop a strong visitor-oriented internet presence for downtown</td>
<td>Provide an opportunity for property owners within historic districts to propose more specific or rigorous standards</td>
<td>Create a “Historic Preservation” page link to the City’s Internet Home Page, to allow residents to access lists and maps of notable historical and cultural resources.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Assist with neighborhood planning process to identify character defining elements of the neighborhood.</td>
<td>Prepare a guidebook on historic preservation that could be used by property owners to remodel, expand buildings, or construct new buildings in a style that is sympathetic to the other structures in the area.</td>
<td>Incorporating local history information into appropriate visitor activity guides and event publicity</td>
<td>Continue to distribute forms and brochures relevant to the goals of the Heritage Commission, for the purpose of encouraging public participation.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Seek to have appropriate Preservation Plan goals, recommendations and strategies adopted as a plan element of the Comprehensive Plan.</td>
<td>Investigate the use of U.S. DOT (Department of Transportation) Transportation Enhancement Funds and other State and Federal programs for implementing certain historic preservation objectives.</td>
<td>Develop a school outreach program to involve children in Burbank history.</td>
<td>Continue to develop a list of famous individuals who have lived in Burbank.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Maintain monthly contact with neighborhood associations.</td>
<td>Help to develop a program for publicly recognizing outstanding historic preservation efforts. Awards could be presented at Common Council meetings and newsletter articles could be placed in Wausau Works</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Provide more assistance to property owners and neighborhood associations.</td>
<td>Work with the State Historic Preservation Office to extend certified local government (CLG) status to Wausau and thus become eligible for training and technical assistance and certain types of grants.</td>
<td></td>
<td>Develop a program to involve the community in the photography of places and structures of historic interest.</td>
<td></td>

To: Historic Preservation Commission
From: Brad Larson, Planner
Subject: Historic Database functions
Date: February 21, 2013

This memo is to provide four examples of Historic Databases that work with GIS to begin the discussion of how the Cedar Rapids database will function. HPC members should go to the links provided and consider what works well and what does not. HPC members are also encouraged to find other examples they feel work well.

Background:
As part of the Memorandum of Agreement for the demolition of residential homes, the City of Cedar Rapids has agreed to establish a database of historic resources that will be useable through the City’s GIS website(s). Below are four examples of historic databases with GIS functionality. This discussion will be used to draft the City of Cedar Rapids database and GIS website.

City of Whittier, CA
http://gisweb.cityofwhittier.org/SilverlightViewer_1_2/?Viewer=City%20of%20Whittier

Overall Map View (Map includes historic district boundary and info, buildings, features such as walls, trees and lampposts, and other characteristics)
Southampton, NY
http://historic.southamptontownny.gov/

The user chooses whether to see NRHP sites, NHL sites, local town or villages sites. Then a window pops up with tabs for each property. Clicking on the tab shows the data in the window, then moves to the site on the map. Each site has links to scanned inventory forms and photos (powered by JAVA):
Massachusetts Historical Commission (SHPO)
http://maps.mhc-macris.net/
Each site is linked to the MA SHPO’s cultural resource inventory database.

Kansas Historic Resource Inventory (SHPO)
http://khri.kansasgis.org/

General Map View with Property Selected
Hit the Details Button on the Map and an Inventory form pops up.

Program has a search engine to find specific properties or geographic areas.
March 4, 2013

Project #V13718

Mr. Thomas Smith
Cedar Rapids Historic Commission
City of Cedar Rapids
101 1st Street SE
Cedar Rapids, IA 52401

To Whom it May Concern:

Notice of Initiation of the Section 106 Process—Public Participation in accordance with the FCC’s Nationwide Programmatic Agreement. i wireless intends to file an application to collocate antennas on an existing building at 101 2nd Street SE, Cedar Rapids, Linn County, IA.

In addition to the obligations set forth in the local zoning regulations, i wireless must also comply with all Federal and State regulations governing the proposed facility.

Section 106 of the National Historic Preservation Act of 1966, as amended, requires i wireless to evaluate this project for any effect it may have on Historic Properties. As part of this evaluation i wireless is required to publish Public Notice in an effort to gather comments on the potential effects of the proposed facility on Historic Properties.

The purpose of this letter is to:

- Notify the Cedar Rapids Historic Commission that Public Notice seeking comments, on the potential effects of the proposed construction on Historic Properties, is scheduled to be published in the Cedar Rapids Gazette on February 28, 2013.
- Invite comments, on the potential effects of the proposed facility on Historic Properties, from other relevant individuals or groups that you may be aware of.

Parties interested in submitting comments regarding any potential effects of the proposed facility on Historic Properties may do so by sending them to GSS, Inc., 3311 109th Street, Urbandale, IA 50322.

Attached to this letter are the following: a topographic map, street map, aerial photograph, photographs, drawings, a copy of the Public Notice and a copy of a letter submitted to the City of Cedar Rapids.

Questions about this matter may be submitted to GSS, Inc., 3311 109th Street, Urbandale, IA 50322 or by calling (515) 331-2103.
NOTES:
1- UTILITIES WILL BE BROUGHT FROM THE BASEMENT DEMARC ROOMS, EXACT ROUTING WILL BE COORDINATED WITH THE UTILITY COMPANY, BUILDING MANAGER AND BUILDING ELECTRICIAN.
2- APPROXIMATE EQUIPMENT LOCATION:
   LATITUDE: 41°58'42"
   LONGITUDE: -91°42'06"
3- PROPOSED (6) 2G ANTENNAS AT ELEVATION 120' ± - AZIMUTHS TBC
4- PROPOSED (3) 4G ANTENNAS AT ELEVATION 120' ± - AZIMUTHS TBD
5- GPS MOUNTED ON TOP OF HANDBR ID PLANTFORM OR PENTHOUSE DEPENDING THE APPROVED LEASE AREA
6- EXIST DRAWINGS ARE FOR PRELIMINARY DESIGN AND CONCEPT AND MAY CHANGE WITH STRUCTURAL ANALYSIS, SURVEY OR FURTHER DESIGN INVESTIGATION.

OVERALL VIEW
STATE OF IOWA
Counties of Linn and Johnson ss.

I, Tim McDougall, do state that I am the publisher of THE GAZETTE, a daily newspaper of general circulation in Linn and Johnson Counties, in Iowa. The notice, a printed copy of which is attached, was inserted and published in THE GAZETTE newspaper in the issue(s) of February 28, 2013.

PUBLIC NOTICE
Notice of initiation of the Section 16 Process-Public Participation in accordance with the FCC's Nationwide Programmatic Agreement. I intend to file an application to collocate antennas on an existing building at 101 2nd Street SE, Cedar Rapids, Linn County, IA. Parties interested in providing comment on the proposed undertaking relative to cultural resources should contact CGS, Inc., 3211 30th Street, Urbandale, IA 50322 (515) 335-2103. V125746.

This instrument was acknowledged by Tim McDougall before me on February 28, 2013.
