Conneaut Planning Commission MEETING AGENDA June 4, 2019- 6:00 P.M.

Meeting: Call to Order

Stand for the Pledge of Allegiance

Roll Call: Joe Zingaro _____ Rebecca Gaugh _____ Judy Parlongo _____
Diana Spencer _____ Paul Sedmak _____ Mindy Notte _____

Approval of May 7, 2019 Meeting Minutes

Motion _____

Second _____

Roll Call: Rebecca Gaugh _____ Mindy Notte _____ Judy Parlongo _____
Paul Sedmak _____ Joe Zingaro _____ Diana Spencer _____

New Business: Truck World, 780 State Rte 7, Conneaut, OH
Representing: Gary Burke (Owner) & Sam Sowards, Engineer

- Final Grading Site Plan
- CT Consultant's Final Grading Approval Review – Dave Frey, Engineer
- Final Site Plan will be reviewed at July 2, 2019 meeting

New Business: Cortina Leather (Former Conneaut Leather) 494 E Main Rd., Conneaut, OH
Representing – Jack Prause, CEO & Matt Conway, Hughes Roller (Builder)

- Twenty-Eight (28) Thousand SQ FT Expansion Site Plan Review
- Ct Consultants Approval Review – Dave Frey. Engineer
- CT Consultants Zoning Site Plan Review (ZBA Variances)– Kris Hopkins, Planner
 - 1134.04 (g) Parking spaces not permitted in required front yard.
 - There are currently 6 parking spaces located in the required front yard (an existing nonconforming condition). The proposed plan shows the addition of two more spaces. Expanding a nonconforming condition is not permitted, and based on 1134.02(b), the code requires the 6 existing spaces to be removed. A variance is required to allow the existing 6 spaces to remain and two more to be constructed
 - 1134.05 (Schedule 1134.05(d)(7) A.)
 - Number of parking spaces is less than required by Code.
 - The existing site does not provide the number of parking spaces required for “Manufacturing plants” (1 space per 800 sq ft of gross floor area); 67 spaces required, 54 spaces provided (81% of required). The proposed expansion will add 37 spaces for a total of 91 spaces, which is still less than the 103 spaces required (88% of required). A variance is required to allow fewer spaces

New Business – O’Reilly Auto Parts – 390 State St., Conneaut, OH 44030
Representing: Mike Long, Bartlett Signs

- Certificate of Appropriateness Application to approve & install
 - 75’ SQ FT Pole Sign at entrance
 - 121 SQ FT Wall Sign on front of building
 - ZBA tabled until Certificate of Appropriateness is approved

New Business: ORDINANCE NO. 34-19

- City Council created Ordinance for Planning Commissions Review & Approval

Old Business: Bed & Breakfast

Planning Commission Meeting Minutes May 7, 2019

The Conneaut Planning Commission met for their regular monthly meeting on May 7, 2019 beginning at 6:00 pm. The Pledge of Allegiance was recited. Role was called; in attendance were Ms. Notte, Mr. Zingaro and Mrs. Gaugh and Mr. Sedmak. Mr. Zingaro asked for a motion to excuse Mrs. Parlongo and Mrs. Spencer. Mr. Sedmak made motion and Mrs. Gaugh seconded the motion. Roll was called - all approved – motion carries.

When the March 5, 2019 meeting was held, the meeting was recorded by a court reporter and the minutes were submitted last month as that court report. At that time, it was discovered that the court reporter only reported on the minutes concerning the O'Reilly Auto Parts portion of the meeting. Minutes of the first part of the meeting were compiled, which concerned the outdoor storage at Gateway Plaza. Mr. Zingaro asked for a motion to approve these minutes. Ms. Notte made a motion to approve, seconded by Mr. Sedmak. All approved, motion carried.

Mr. Zingaro then asked for a motion to approve the minutes from the April 2, 2019 meeting. Motion to approve was made by Mrs. Gaugh and seconded by Mr. Sedmak. All were in favor, motion carried.

New Business – Metro Parks represented by Larry Frimerman, Bob Best, Board President and Brett Bellas, Operations Manager

Mr. Frimerman shared maps of Metro Parks with the Planning Commission Board that is a part of and a reflection of the Comprehensive Plan which is to create a connection and protection for Conneaut Creek and a connection to permit access for fisherman, people just interested in getting to the creek, hiking or walking and be able to connect the streams with downtown and ultimately all the way out to Camp Pete, so that is the big picture. We were able to obtain some grants, mostly one hundred (100%) percent grants covering all of the costs of acquisition for/through water resources restoration sponsorship through the Ohio EPA and there is a capital bill project and an "Inleiu"(sp) fee project all of which are hundred (100%) percent funding, which made it easy. This property the one we are referring too, is the only one that we have any acquisition costs associated with, just so you know it looks like we have spent a lot of the public's money and we haven't. We

have leveraged probably 1.3 million dollars through each of those totals. This is going to be an anchor for that, the plan is to have this be an opportunity for hiking and connection for your bike trail and going over the arch bridge. It is a good gateway into downtown or from downtown to what will be a really lovely setting and park.

Mr. Sedmak – Are you going to be doing renovations to the bridge

Mr. Frimerman – That is your bridge

Mrs. Brown- Jim Hockaday has plans for the bridge

Mr. Frimerman – The key is that for us to have interpretive signage and access, we will need the parking and trails and that is exactly what we are providing. With that, he asked Brett to walk the Planning Commission Board through details on parking.

Mr. Bellas – Basically the foot print of the old house that we demoed – what we are planning to do is to come in down the driveway and where the porch is from Mill Rd. to the edge of the parking lot is roughly fifteen (15) feet, that is where the sidewalk came in (showing on overhead GIS view). The front porch area will be the beginning of our parking area. The area that was disturbed from the demolishing, we will only be taking out about another fifteen (15) to twenty (20) feet going back towards the oil well and basically graveling the entire parking lot with 304 base with 411 on top and letting that sit and having a parking area. It's a very simple parking lot, just stone and it is going to shed the water toward the big tree to your left, everything is slopped that way, going into the natural run off the same way the house did.

Mrs. Brown – Jim Hockaday and Shawn Aiken (Ct Consultants) said that the gravel parking lot will be more porous than the house was.

Mr. Zingaro- Is that located in a flood plain

Ms. Shubitowski – I have heard that house has flooded numerous times

Mr. Bellas/Mr. Frimerman – I understand the basement of the house did but the gravel parking lot will not be affected by the water and it will drain off. That is the extent of the parking lot. I did send sign details and blueprints.

Mrs. Brown – Where is the sign and kiosk placement

Mr. Bellas – The kiosk will be back over here (showing on the GIS overhead) basically when someone comes to the park the first thing, they want to do is see the rules and regulations of the park and where the trails go. The entrance sign is being proposed where the sidewalk went in (in this area here – looking at overhead on GIS)

Mr. Zingaro – Will the sign have to go before ZBA

Mrs. Brown – No – it is a standard sign

Mr. Sedmak – Are you going to make that sign visible from Rte. 7

Mr. Bellas – Unfortunately the building across the street will block the visibility of the sign

Mr. Frimerman – What you will probably want is a directional sign

Mr. Zingaro – What about the Kiosk

Mr. Bellas - It is a giant information board that is standard throughout all the Metro Parks

Board – They were discussing areas that had Kiosks amongst themselves (inaudible)

Mr. Zingaro – What about the Boardwalk

Mr. Bellas – The boardwalk will come off of the parking lot and run down toward the Conneaut Creek – showing the trail of the boardwalk on the GIS overhead and its about 352 feet long. The boardwalk is pre-fab boardwalk and it sits on 12 to 18-inch plates and each plate is adjustable. We are installing one in Harpers field this year. We used something similar in Geauga County and they have had no problems. The framing is galvanized and 2X6 treated lumber going across. We will need to pound it into the ground as you are not aloud to do any drilling into it and it will be no more that twenty-four (24) inches off the ground with railings.

Ms. Gaugh – Is it similar to the boardwalk at the beach

Mr. Frimerman – Yes. This boardwalk is very flexible and adaptable for the setting. It can be moved if needed, water will run underneath and if it happens, the water can run over top of the boardwalk as well without damaging anything

Mr. Zingaro – Is it open 365 days a year

Mr. Frimerman – Why not

Mr. Sedmak – What is your completion date

Mr. Bellas – Once everything is cleared for permits, we will start right away

Mr. Zingaro – The Board would like it in writing from CT Consultants that the storm water calculations are good for the driveway, other than that I see no problem with this issue.

Mr. Zingaro – I will entertain a motion to approve the Metro Parks Sign, Kiosk, Boardwalk and gravel parking lot located at 431 Mill Rd., Parcel ID # 12-313-00-013-00.

Mr. Sedmak – Made motion to approve Metro Parks project

Mrs. Gaugh – Second the motion

Roll was called – All Approved – Motion Carries.

Old Business: Bed & Breakfast Best Practices

Mr. Zingaro – We need a definition before we do anything else

Mrs. Hopkins – I have a resource book and printed out from the American Planning Association that is called “The Definitions for Planning” and what they have done is collected definitions from around the United States and there is no analysis in terms of what is a good definition or bad definition, they just give you examples of what other communities have used and they are for your review and consideration.

Mr. Zingaro – I looked at North Perry and it was quite interesting and simple

Mrs. Gaugh – Agreed – she liked the definition too

Mr. Zingaro – Mindy as we looked over your report, which was excellent by the way – could you give us a little background on what you found

Ms. Notte- I think there a number of properties and different types whether it is a big house or small house, a beach cottage or a traditional Bed and Breakfast ...

Mr. Zingaro- Looking at the pictures; this is Grandpa’s Castle correct

Ms. Notte – Yes that is a traditional Bed and Breakfast – I think there is a lot of diversity, there is a lot more that we thought we had once I started looking at multiple sites and I am sure there are some that are flying under the radar that are just not on websites and people know about them from word of mouth. There are a lot of people using this right now to offer more beds in Conneaut and from what I have seen, I was pleasantly surprised in terms of the condition of things as they were reflected, but not only that, but the reviews, even something that I would not stayed in myself, they still got really good reviews because they were clean, etc. I think because there is such a diverse type of properties I don’t know if it makes sense if we try to find that balance being specific as

possible and clarify what we expect from a safety perspective but have some level of ambiguity around what that type of property looks like and focus more on what we require from a safety perspective vs. a Bed and Breakfast has to be xyz...that's just my opinion on how simplified or complicated it is. If we look at the USE of these, is it a good thing, in my opinion I think it is, we have a lack of beds in town and we want to attract people, and I think a lot of times we attract people who are looking for a low cost, family oriented, low key – I like pizza, go to the beach kind of thing, its comfortable and inexpensive, and I believe that kind of resonates with people.

Mrs. Gaugh – I have family that comes from all over and when they stay here, they are looking for something that is going to be a lot cheaper than a hotel.

Ms. Notte – Most people are looking for inexpensive, but also there is a home on Lake Erie St that only talked about how great their experience was because of the host. We have a lot of fisherman, tourists coming to our area and I think we have a really great option for housing for people here, especially considering like a big hotel, although we may get that at the Lake front it is not going to cater to all the types of people that want to come here. It will cater to people that we want to attract that we haven't yet – so it is an important part of it, I think it is still the reality of our town
Mr. Zingaro- Was it mentioned before that I believe the construction crew was having a hard time finding lodging for there long stay here while they worked on the pipeline.

Mrs. Gaugh – I see they are eating at our restaurants, so it is really helping our local businesses.

Mrs. Notte – I was thinking too, how does this connect with the tourism board and what they are trying to accomplish as well and their objectives

Mr. Zingaro – Asked Kris what she would suggest the definition be

Mrs. Hopkins –Are you considering anything other than a Bed and Breakfast

Mrs. Gaugh – We have more than Bed & Breakfast we have a lot of Short-Term Rentals because a lot of people stay for like two or three weeks

Mrs. Hopkins – So I think if you feel there is a market for both kinds, I think that it makes sense to regulate both kinds because I think you get more compliance if you have the rules spelled out for everyone to follow

Mrs. Gaugh – Do we have any boarding homes that just rent out rooms

Ms. Notte – I did not find anything that rent just rooms although I would say that is something that people probably do

Mrs. Gaugh – I'm thinking they probably do that during D-Day

Mrs. Hopkins – A Boarding House is something more like you live their full time. The Bed & Breakfast and Short-Term Rentals are more transient although you may have someone temporary like a worker who is here for more than 30 days. The reason I provided the definition for family is because it is becoming more and more acceptable to acknowledge you can have a certain number of unmarried people living together that came out of places like college towns like groups of students living together. So, if you have a family definition like this that allows you to have up to four (4) unrelated individuals living together then that basically encompasses a Boarding House.

Discussion amongst the board (inaudible)

Mrs. Hopkins – There are definitions you can add to refine the Short-Term Rentals to be a “hosted property” vs. “un-hosted property”. The hosted property is where the owner is there and un-hosted is when the owner is not there like if the owner leaves for a few weeks and someone comes and stays while the owner is gone.

More discussion amongst the board (inaudible)

Mrs. Hopkins – A Bed & Breakfast is more where someone is taking care of you and a Short-Term Rental is more you are taking care of yourself

Mr. Zingaro – So we need a few definitions

Mrs. Gaugh – Yes, I think so just to make sure everybody is covered and the safety issues are addressed

Mrs. Notte – I think if we could find some balance of how do we give ourselves the ability to regulate and take care of something if there is an issue but without being overly invasive and making it difficult for somebody to do this since we feel it is a good thing or could be a good thing overall.

Mrs. Gaugh – Would like to know how the tourism board feels

Mrs. Hopkins – What are your concerns on how the tourism board feels. Do you think they might be to much of a threat to the hotel business

Mrs. Gaugh -That it is to much of a threat to the tourism business

Mrs. Hopkins – It feeds the tourism business

Mrs. Gaugh – I think so, but I would just like to know what they think

Board agreed it would be good to have the open communication and feedback from the tourism board...more discussion inaudible

Discussion around house swapping – inaudible

Discussion with definitions need to comply with zoning

Board discussion- Bed and Breakfast typically has a sign and is a conditional use permit because they typically employ one or two people, there is parking regulations etc. where a short-term rental does not typically display a sign because it is a rental of the home and considered “un-hosted” where neighbors cannot usually tell. – That would be the distinction between B & B / Short-Term Rentals because short-term rentals are mostly done online and do not have a sign, however in Conneaut a lot of the short-term rentals have signs.

Mrs. Hopkins – All communities are required to have a content neutral sign regulation because of freedom of speech – like for sale signs, political signs, etc.

Board discusses all the short-term rentals in the area that do advertise with a sign and reviewed the pictures Mindy took of all the rentals in town.

Summarize – a Bed and Breakfast will usually advertise with a sign, employ 1 or 2 people and rent out rooms – a short-term rental does not usually have a sign, advertise online and do not have employees, and rent out the entire home.

This is a great way to help the community by bringing in outside dollars so that you are helping to improve tax dollars and they are spending money in our local businesses and restaurants. The board agrees that getting the tourism board involved is a really good idea. It makes sense to

collaborate with the Tourism Board because the Tourism Board may also advocate for similar regulations for the whole area and if everyone is doing very similar things there is consistency and having an entire county experience.

Mr. Zingaro – How do we go from the talking stage to the action stage

Mrs. Gaugh – We would like to get the definitions to counsel

Mrs. Hopkins – You will need more than a definition

Mr. Sedmak – I think Mindy should lead us on this – she has the most experience with very positive ideas than I have heard since I have been on the Planning Commission

Mrs. Gaugh/Mr. Zingaro – Both agree that Mindy is the most experience to lead this Ordinance

Ms. Notte – I'm happy to do whatever I need to help to meet the goals of our City.

Mr. Zingaro – What goals should we set

Mrs. Gaugh – Don't we need definitions first

Mrs. Hopkins – You will need the whole package

Mr. Sedmak – Everything Mindy said is the whole package, we just need you to put it together

Ms. Notte – So basically want me to take a stab at what I would recommend for you guys

Board – Yes, Yes.... everything you have said – the package is there all we have to do is put it in a ball

Ms. Notte – We are talking definition, signage, parking

Mrs. Gaugh – I would like to see you go to City Council and present it

Mrs. Hopkins – Just so you all know – you do not have to start with Council, you can start your legislation here and use the examples given and draft your regulations and requirements (parking, signage) and give them to Kyle for review

Ms. Notte – For next meeting I will do some heavy lifting on what I feel like a definition would be and highlight what I took out and put in and review it at that meeting and then take it to Kyle for review

Mrs. Gaugh – How do we make sure people have the proper insurance in place without invading their privacy

Mrs. Hopkins – I think that is something you can require them to show proof of insurance when application is made for a Business Permit – and if it is made a requirement to be inspected every

3 years – they would need to update our records with proof of insurance to have their permit renewed.

Board discussed commercial inspections by the fire department, zoning inspections and how/when they should be conducted – ex. Complaints etc ... more discussion about B & B's and Mindy's experience in Washington. The board expressed their trust in Mindy Notte and her networking skills and appreciate her going above and beyond.

Mr. Zingaro -Entertain a motion to adjourn the meeting

Ms. Notte – made motion to adjourn the meeting

Mrs. Gaugh – second the motion

Roll was called – all approved. Motion carries – meeting adjourned at 7:17 p.m.

Time Meeting Adjourned: 7:17 p.m.

Sowards Engineering Consultants, LLC***

Dear Ms. Brown:

We have reviewed the grading plan received on May 15, 2019 and recommend it for approval. Please note this is not the final site plan approval but only the grading plan. Please direct the engineer representing the owner to send in stormwater calculations for the final site plan review.

Should you have any questions or comments, please do not hesitate to contact us at your earliest convenience.

Respectfully submitted,

Mr. Gary Burke
6813 Commerce Drive
Hubbard, OH 44425

*RE: Truck World Final Grading Site Plan
780 State Route 7, Conneaut, OH 44030*

Dear Mr. Burke,

We are pleased to inform you that City of Conneaut's Planning Commission met, reviewed and approved the Final Grading Site Plan to move soil to 780 State Route 7 for preliminary grading with the following conditions:

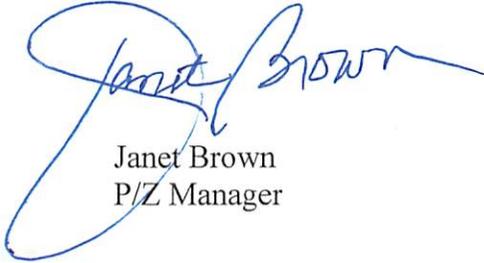

1. Detailed plan outlining sedimentation and erosion control measures as well as dust control and clean-up procedures.
2. Location of ingress and egress with traffic maintenance control; prior to start of project this should be discussed with the City
3. Surety bond in favor of the City or other agreement regarding road use and maintenance; prior to start of project this should be discussed with the City.
4. Full compliance with all requirements from the Ohio EPA and United States Army Corp of Engineers (USACE). It should be noted that all regular, temporary or limited permits for relocating fill and site grading from the OEPA or USACE should be copied to the City for our records prior to the commencement of work.

We look forward to working with you on this project. In order to aid in the final permitting process we have enclosed the Commercial Application for new structures and fee schedule. Please feel free to reach out to our office for any assistance in the preparation or submission of your application.

Due to the large and special nature of this project, we will want to ensure sufficient lead-time for review. Please also feel free to submit preliminary or draft documents for early feedback.

The Ashtabula County Building Department will require permits for this project. Please contact Mr. Todd Nagy, Chief Building Official at (440) 576-3737 for more information on County requirements.

Sincere Regards,

A handwritten signature in blue ink that reads "Janet Brown". The signature is fluid and cursive, with a large loop at the beginning of the first name.

Janet Brown
P/Z Manager

CROSSING AND ROAD USE AGREEMENT CITY OF CONNEAUT AND TRUCKWORLD

This Agreement is dated the 24 day of MAY, 2019 by and between the CITY OF CONNEAUT, by and through its authorized representative, James Hockaday City Manager, 294 Main Street, Conneaut, Ohio (the "City") and TRUCK WORLD, INC. ("TW") for the purpose of protecting parts of Under Ridge Road and Route 7 arising from TW construction of a new facility located at the southeast corner of Interstate 90 and State Route 7, (the "Project" or "Project Area")

Whereas, TW plans to hire contractors, subcontractors and material suppliers to construct a new TW facility at the Project Area

Whereas, the parties acknowledge that the construction of the TW facility will involve heavy machinery and equipment likely to damage Under Ridge Road and State Route 7 which are used by residents and others. It is further understood and acknowledged that Route 7 is a State-owned road for which TW must obtain permits and follow the laws and regulations of the State of Ohio as determined by the State of Ohio. This Agreement in no way infringes or impedes the rights, laws and regulations of the State of Ohio to regulate Route 7 and to seek damages or other relief arising from TW, its employees, contractors and agents during the installation and construction of the TW facility.

Now, therefore, for valuable consideration, receipt of which is hereby acknowledged, the parties agree as follows to allow TW the right to use a designated portion of Under Ridge Road running from State Rt 7 1500 feet east for the purpose of moving heavy machinery for the construction of the TW facility pursuant to the terms and conditions set forth herein.

1. The City hereby represents and warrants to TW that (i) the City has the power and authority to enter into and carry out its obligations under this Agreement; (ii) the execution, delivery, and performance of this Agreement have been duly authorized and no other action on the part of the City is necessary to authorize the execution and delivery of this Agreement or the performance of the Agreement by the City; and (iii) this Agreement has been executed and delivered on behalf of the City and constitutes a legal, valid and binding obligation of the City enforceable against the City in accordance with its terms.
2. Beginning the 1st day of May, 2019, the City, subject to the rights, laws and regulations of the State of Ohio, grants TW, its assigns and successors, the use of the designated portion of Under Ridge Road and, to the extent permitted by State law, State Route 7, for hauling heavy machinery and, in certain instances, digging through or under such roads, for the purpose of constructing and installing the new Truck World facility at the southeast corner of Interstate 90 and Route 7, subject to the terms and conditions of this Agreement and such plans as have been provided to the City. The right granted TW to utilize Conneaut public roads shall include all rights reasonably incidental to the Project, including, without limitation, the right to conduct construction activities in the Project Area, rights of ingress and egress, and the right to store equipment, materials, and waste in connection with construction of its new facility.
3. TW agrees to use heavy equipment only on the designated portion of Under Ridge Road and State Route 7:
 - a) During the construction of the TW facility, TW intends to use approximately 1500 linear feet of Under Ridge Road east of State Rt. 7 and agrees to maintain that portion of the road and drainage ditches, or whatever is used or damaged from their

use, in reasonable condition at all times, promptly repairing potholes, ruts and other defects in the road arising from the construction operations of TW, its agents, contractors and employees. During its construction, TW agrees that it will keep at least one lane on Under Ridge open to traffic, except during such periods not to exceed 5 minutes. TW shall provide at least 48 hours written notice to the City for any road closure exceeding 5 minutes. At all times TW shall repair and restore drainage ditches promptly to allow for property drainage. TW shall use flaggers and other such traffic signals during construction as may be recommended by the City Engineer. Debris and mud shall be removed, and potholes or other damage repaired within 24 hours for all roadways,

- b) During construction, TW further agrees to use ODOT approved soil erosion precautions and systems on all roadways to prevent damage to the roadway, private property and natural waterways. TW shall further maintain the roads in such condition to allow for school buses at all times. The City assumes no responsibility to TW for providing access to the worksite or travel routes, except as provided herein, and TW shall hold the City and State of Ohio free and harmless of any claims or liability for property damage or personal injury arising from the acts or omissions of TW, its contractors, employees and agents; and TW shall indemnify the City and State for any such claims incurred.
- c) Excepting force majeure, TW shall complete the project according to plans and specifications no later than September 1, 2019, including restoring each road mentioned herein to the condition existing prior to April 1, 2019, and remediating

any damage it has caused to the roads, adjacent drainage ditches or private or public property as follows:

- i) Drainage ditches shall be cleaned and dug to a depth meeting ODOT requirements and shall drain properly. Public and private culverts shall be repaired or replaced if damaged by the construction.
 - ii) Those portions of Under Ridge Road thereof, damaged by the acts or omissions of TW, its contractors, agents, etc., shall be rebuilt to a width of at least 22 feet, graded, compacted and crowned in accordance with the provisions set forth in the estimate attached hereto as exhibit 3.
 - d) No later than September 20, 2019, the TW shall pave that portion of Under Ridge Road, extending from Route 7 to a point 1500 feet east in accordance with site plans approved by the City of Conneaut and in accordance with ODOT specifications for drainage and paving.
4. TW shall further name the City as an additional insured for liability insurance in the amount of Five Million dollars (\$5,000,000.00) acceptable to the City for property and permanent injury claims arising from the acts or omissions of TW, its contractors, employees and agents.
 5. TW agrees that it will provide ODOT approved markers and barriers to protect the public from entering into the construction area or slipping into an open trench or uneven part of the roadway. TW further agrees that it will be solely responsible for any claims or damages arising from its or its contractors or agents' negligence or willful misconduct with respect to its construction, installation, maintenance or restoration of the roadways and associated

road crossings, including traffic control, holding the City of Conneaut, its employees, contractors and agents free and harmless thereon and shall indemnify the same.

6. TW agrees that it shall obtain all necessary permits and easements from the State of Ohio and any other relevant party, if applicable.
7. No later than five (5) days prior to beginning construction of the Project, TW agrees to provide the City of Conneaut with the following:
 - a) Road repair estimate (Exhibit 1)
 - b) Certified copy of liability insurance naming City as a named insured in the amount of \$5 million (Exhibit 2)
 - c) Names, addresses and phone numbers for all contractors and subcontractors employed on the Project, including documentation that each has complied with State of Ohio requirements for liability insurance and Worker's Compensation. (Exhibit 3)
8. TW shall not commence work on the Project until such time as it has received written notification that all conditions have been met as shown in paragraph 8 to the satisfaction of the City of Conneaut, which shall not be unreasonably delayed or withheld.
9. TW shall be solely responsible for damages arising from its negligence or willful misconduct with respect to the trenching, installation, maintenance or restoration to the roadway, water lines, sewer lines, drainage lines and any other utilities, and shall hold the City free and harmless thereon, and indemnify the same.
10. TW shall pay to the City the sum of \$400 per day for inspection of the trenching, installation and restoration of all road cuts, and shall provide 48 hours' notice to the City of all start and ending times of work. Work will be conducted only from Mondays through

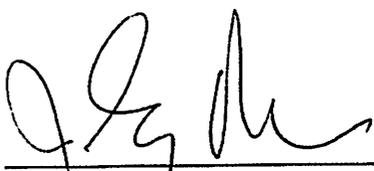

Saturdays, and at the end of each week, beginning no earlier than 7:00 am and ending no later than 5:00 pm. TW will pay the City as invoiced in full for the week. The City shall choose the inspector of its choice who shall be present at all times during the work.

11. TW shall not assign any rights or obligations to this Agreement without the prior express written consent of the City.
12. Upon completion, TW shall restore the Project site to as close to its condition prior to the commencement of work as reasonably practical except for any damage not arising from the trenching, installation, maintenance or restoration of the roadway as part of the Project.
13. The parties agree that the Courts of Ashtabula County shall have exclusive jurisdiction to hear and resolve all disputes arising from this agreement.
14. Except in the case of emergencies or unexpected outages, TW shall provide at least 48 hours' notice to the City and affected residents for any interruption in utility service.
15. The City may terminate this Agreement, and halt the work on the Project, if TW or any of its contractual agents or employees violates any material term or condition of this Agreement and fails to cure such violation within 48 hours of the City's written notice to TW of such violation.
16. As-builts for any Non-TW utilities relocated as part of the Project shall be documented and submitted to the City of Conneaut Engineer Department.
17. The deadlines listed in this Agreement may be extended by mutual agreement of both parties.

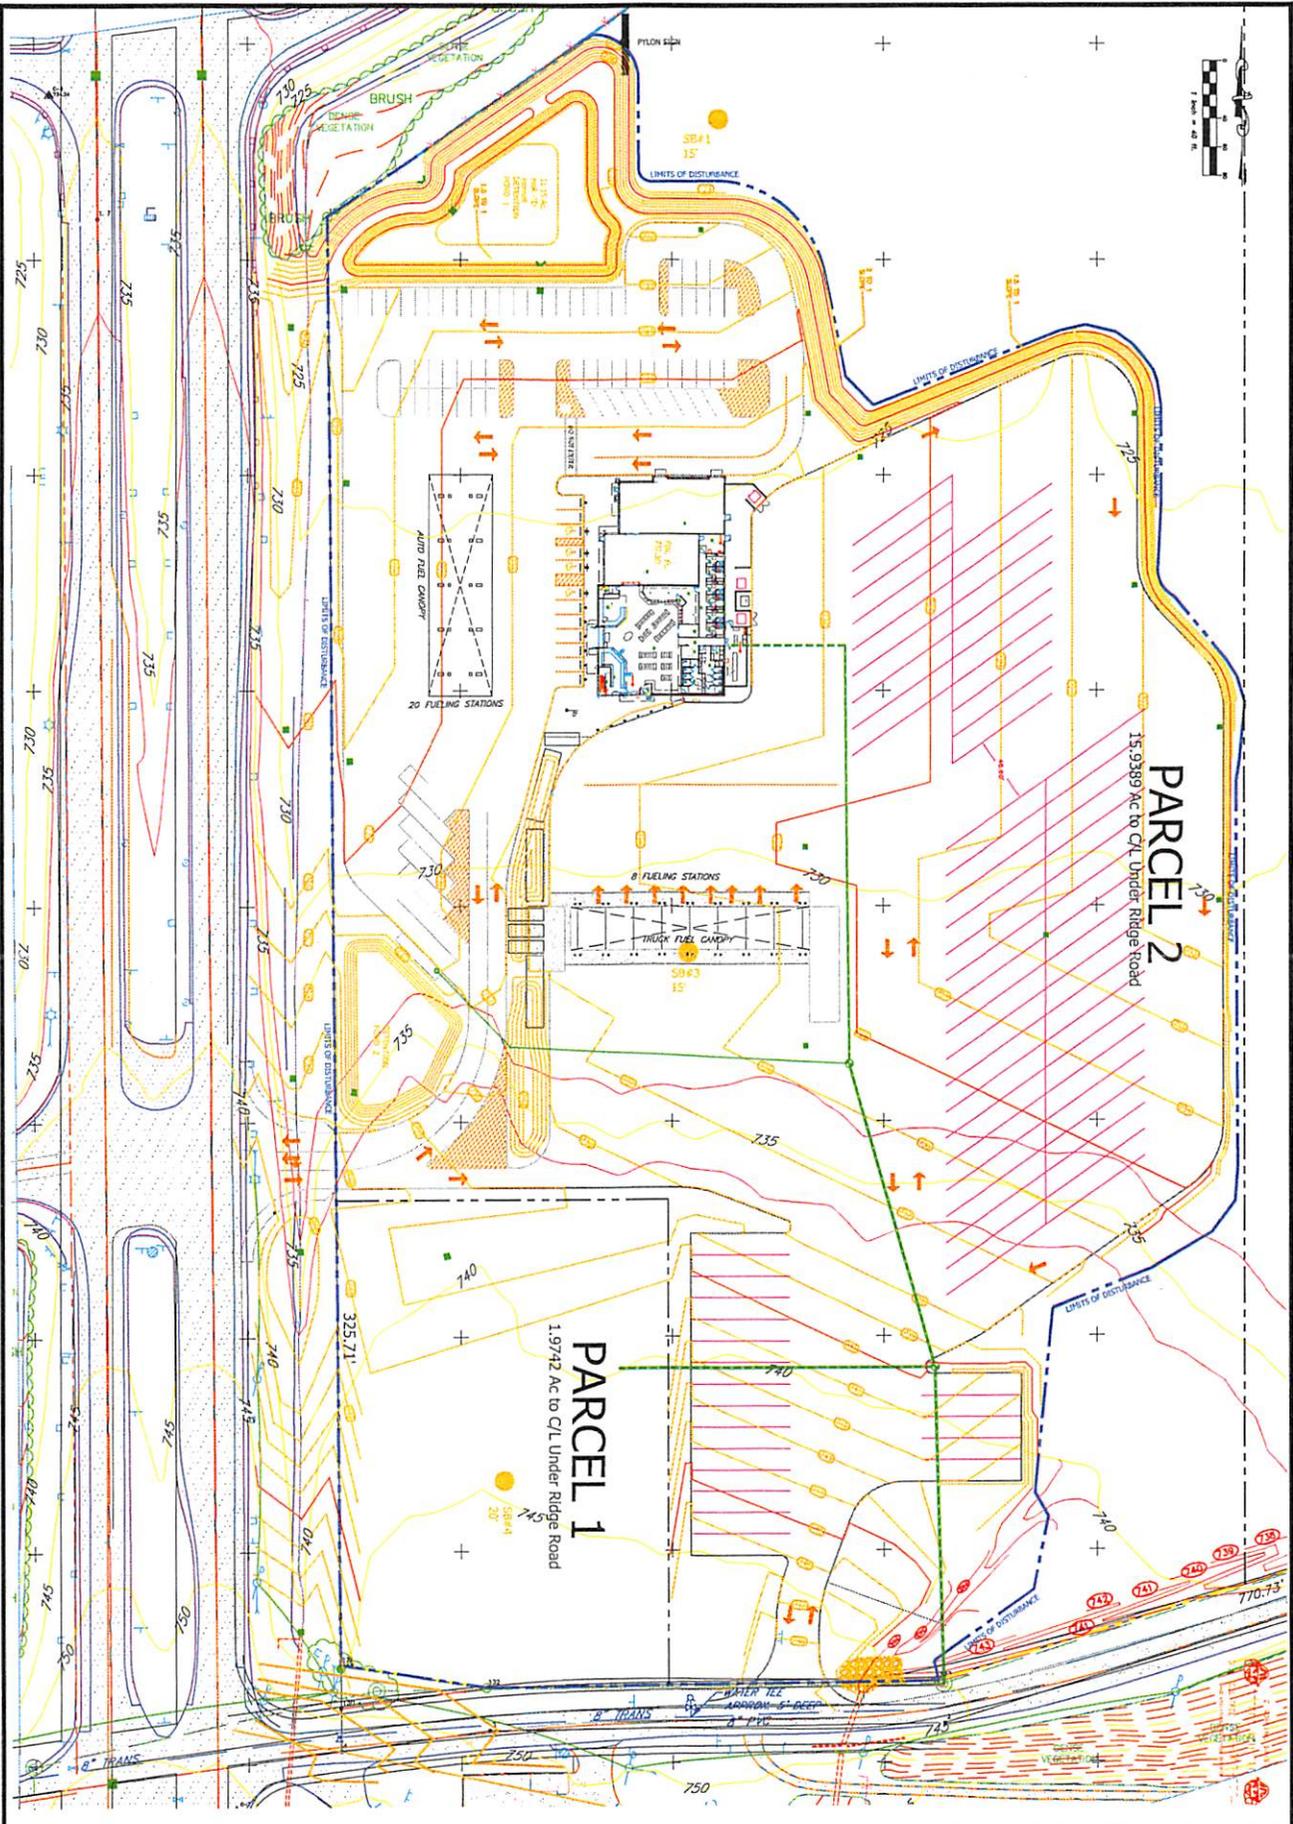

18. This Agreement shall be binding upon and inure to the benefit of each of the parties hereto and their respective successors and assigns.

**Re: Conneaut Leather Proposed Expansion
 494 East Main Road (US 20)**

Dear Ms. Brown:

I have reviewed the subject drawings (existing conditions and proposed site plan) for compliance with the Planning and Zoning Code, and offer the following comments for your consideration.

C.O. Number	Description of Concern	Commentary
1134.02 (b)	Expansion of existing building requires parking to be in conformance with Chapter 1134	The current site does not meet the parking requirements spelled out in the recently adopted Chapter 1134. Any expansion of the existing building requires all aspects of the parking plan to comply with Chapter 1134.
1134.04 (g)	Parking spaces not permitted in required front yard.	There are currently 6 parking spaces located in the required front yard (an existing nonconforming condition). The proposed plan shows the addition of two more spaces. Expanding a nonconforming condition is not permitted, and based on 1134.02(b), the code requires the 6 existing spaces to be removed. A variance is required to allow the existing 6 spaces to remain and two more to be constructed.
1134.05 (Schedule 1134.05(d)(7) A.)	Number of parking spaces is less than required by Code.	The existing site does not provide the number of parking spaces required for "Manufacturing plants" (1 space per 800 sq ft of gross floor area); 67 spaces required, 54 spaces provided (81% of required). The proposed expansion will add 37 spaces for a total of 91 spaces, which is still less than the 103 spaces required (88% of required). A variance is required to allow fewer spaces.
1134.12 (d)(1)	Parking lot island (required for existing and proposed parking areas)	This section requires landscaping on the interior of parking lots with a minimum amount of 100 square feet. While there is no definition of "parking lot" or the "interior of parking lot," nor specific requirements as to location of landscaping, there is no landscaping shown within or along the perimeter of the existing or the proposed parking spaces. A variance is required to waive the interior parking lot landscaping.

Addressed - They will plant some landscaping
 No variance required

**COMMERCIAL ZONING PERMIT
APPEAL APPLICATION**

I hereby request an appeal for the Zoning Permit that was denied by the Conneaut Planning/Zoning Manager for the following reasons:

- Parking spaces not permitted in required front yard – Section 1134.04(g)
- Number of parking spaces is less than required code – Section 1134.05(d)(7)(A)

I understand that my request for appeal must be accompanied by \$250.00 filing fee that is non-refundable. Appeals must be received by the office of the Planning/Zoning Department before the 20th of each month preceding the next regularly scheduled Zoning Board of Appeals Meeting. Zoning Board of Appeals Meetings are held on the Third Tuesday of each month in Council Chambers.

**APPLICATION FOR
CERTIFICATE OF APPROPRIATENESS**

DESIGN REVIEW BOARD — CITY OF CONNEAUT

Exterior remodeling/restoration/rehab work within a designated Preservation District

Name of applicant: BARTLETT SIGNS, INC.
MICHAEL LONG Date of Submission: 5-24-19

Address of applicant: 7628 KLER DR. FAIRVIEW, PA 16415

Address of subject property if different than applicant: 309 STATE ST CONNEAUT OH

Owner of subject property if different than applicant: SIMON CRECHPIX, LLC

Address of owner of subject property if different: _____

Date of commencement of anticipated project: 2019

Detailed description of work to be done on exterior is needed in order to apply for a Certificate of Appropriateness according to the Design Review Ordinance No. 186-87. Exterior work is the only part of concern to the Design Review Board. Specifics MUST, by the ordinance, state types of materials to be used; colors; sign; lighting and landscaping plans. Architectural appropriateness for the district is the paramount issue. Fill in sections applicable to your project:

Approximate costs you are working within for this phase of project: 22,000

Installing or changing sign? If so, we need know your specific plans (i.e. size, kind of materials, lighted/unlighted, where do you plan to hang, etc.):

INSTALLING NEW FREE STANDING POLE SIGN AND BUILDING SIGN.
NON-CORROSIVE MATERIALS - ALUMINUM - POLY CARBONATE
DETAILED PLANS ARE ON FILE.

Any exterior painting? Please specify colors to be used for building and/or trim. Submitting paint samples would facilitate approval.:

N/A

Exterior cleaning or other exterior surface change?

N/A

Any exterior architectural changes planned? If so, we need detailed specifics:

SIGNAGE: (1) BUILDING SIGN & (1) ROAD SIGN.

Any extensive landscaping plans need detailed:

N/A

Application, Certif. of Appropriateness

Any demolition planned (partial structure or whole)? If so, specify:

NA

Detailed specifications needed of any proposed exterior lighting:

ALL EXTERIOR SIGNAGE IS LOW VOLTAGE LED ILLUMINATED

Other:

Please submit architectural or contractors drawing or an artist rendering IF available. This would aid your application immensely.

Contact person is? MICHAEL LONG Phone: 814-882-1771

Contact persons address if different than those at the top of this form:

ORDINANCE NO. 34-19

Introduced By _____

AN ORDINANCE TO AMEND SECTION 1133.01(m) OF THE CONNEAUT CODIFIED ORDINANCES GOVERNING ACCESSORY STRUCTURES IN RESIDENTIAL DISTRICTS, AND NOT DECLARING AN EMERGENCY.

BE IT ORDAINED, by the City of Conneaut, County of Ashtabula and State of Ohio:

SECTION 1. That Section 1133.01(m) of the Conneaut Codified Ordinances governing Accessory Structures in Residential Districts is hereby amended as follows:

1133.01 GENERAL PROVISIONS.

- a) Street Frontage Required. No lot shall contain any building used as a dwelling unless it abuts at least fifty (50) feet on a street or has a permanent exclusive unobstructed private easement of access or right-of-way to a public street. The Zoning Inspector, in the issuance of a permit, or the City Planning Commission, in case of land subdivision, shall be satisfied that the overall arrangement will not result in a hazardous or inaccessible condition in respect to emergency equipment nor be in conflict with any street plan or local street system adopted or established in the City of Conneaut.
- b) Double-Frontage Lots. Double-frontage lots shall, on both of the streets involved, meet the front yard regulations of the district in which they are located.
- c) Yard Requirements. No part of a yard required for any building may be included as fulfilling the yard requirements for an adjacent building.
- d) Vacation or Utility Trailer. Parking of a vacation or utility trailer in any district shall be prohibited, except in the camping areas in the O-1, Open Space District, except that one (1) trailer may be stored in the rear or side yard of any district, provided that no living quarters shall be maintained or any business conducted in connection therewith while such trailer is parked or stored. No other building or structure shall be attached to a vacation or utility trailer.
- e) Lots Abutting Railroads or Principal Streets and Highways. The side or rear yard of any dwelling abutting any railroad, major thoroughfare, arterial highway, or freeway shall in no case be less than fifty (50) feet from the right-of-way of any railroad, (includes crossing), major thoroughfare, arterial highway, or freeway.
- f) Fences, Walls, Hedges or Similar Plantings or Structures. Fences, walls, plantings or hedges may be permitted in any yard, or along the edge of any yard, subject to the following:
 - 1) Maximum height. Unless specified otherwise in this section, the height of fences and walls shall not exceed six feet six inches (6' - 6") in height in any side or rear yard. In all districts no fence shall be over three feet four inches (3' - 4") in height unless the fence is ninety percent (90%) open, then such fence may be four feet four inches (4' - 4") in height along a property line in a front yard or front yard setback. No wall, planting, or hedge in a front yard or front yard setback shall be over three (3) feet in height.

- A. Fences, walls and hedges within corner visibility areas shall not obstruct the view of vehicles or impede pedestrian traffic.
 - B. In an industrial district, a fence may be permitted up to eight feet in height along the side or rear lot line.
 - C. Junk yards shall be fenced in on all sides with a fence of no less than six (6) feet in height.
 - D. Barbed wire or any other material deemed hazardous shall be prohibited in a residential district except as allowed to contain animals as allowed under the R-1 Residential District.
 - E. Soils used to create a berm shall not exceed 2 feet in height and plantings shall not exceed four feet in height in total.
- 2) Obstructions prohibited. No fence shall be erected or maintained in such a way as to obstruct the vision of motorists and/or prohibit an adjoining property owner from entering or exiting driveways. No fence or wall shall be erected within any public right-of-way.
 - 3) Orientation. A finished side of a fence in any yard shall face outwards away from the property on which they are placed.
 - 4) Exemptions. The following shall be exempt: Electronic fences (such as those used to contain animals) buried beneath the ground shall not be regulated by this section, a temporary fence to enclose a garden located in a rear yard only, fencing required by correctional facilities, for recreational purposes such as ball diamonds or similar recreational purposes, or fencing that surrounds flower gardens of no more than 2 feet in height.
 - 5) Trees, shrubs, flowers or plants shall be permitted in any front, side or rear yard, in conformance with subsection (a) of this section.
 - 6) Other specified structures. Walls, driveways, arbors, curbs, retaining walls, mailboxes, name plates, lamp posts, bird baths and structures of a like nature shall be permitted in any front, side or rear yard provided they do not exceed the height allowed in subsection (a) of this section for front yard fences.
 - 7) Other standards. The following additional standards shall apply to all fences, walls and hedges in any zoning district:
 - A. Fences may be placed up to one (1) foot from the front lot line in a front yard or front yard setback or within two (2) inches of a side or rear property line except that no parts of any fences, including foundations, may extend beyond any lot line.
 - B. If a fence exists in the rear or side yard of an adjacent lot, only one other fence may be placed along the adjoining boundaries of such adjacent lot. Areas between abutting fences must be maintained in accordance with this chapter and the City's Code of Ordinances.
 - C. No wire fence or wire shall be erected in any front yard within a residential district, unless enclosing a retention pond approved by the Planning Commission.
 - D. The use of electric current or charge on any fence or part thereof is prohibited except for the single strand electric fences used for the purposes of containing animals in the Agricultural and R-1 Residential District.

- E. Orange plastic fencing, snow fencing, cyclone fencing, silt fencing, or similar type fencing shall be prohibited in a residential district unless required during construction to comply with other governmental agencies or regulations. When used to enclose a garden, the fencing shall be removed by November 1 of the current year. Snow fencing shall be allowed to be in place from November 1 of the current year to March 31 of the following year to control snow drifting.
 - F. A decorative entry fence with an archway of six feet six inches (6'- 6") in height, including a light fixture or decorative object is allowed for a distance of six feet in any direction that gradually slopes to a height of four feet four inches (4'-4") or less, in a front yard or front yard setback, erected parallel to the property line that abuts a residential walkway leading up to an entry of a residential building or driveway and complies with and does not constitute a traffic hazard.
 - G. A decorative entry gate and/or archway for a driveway entry including a light fixture or decorative object is allowed for a distance of six feet in any direction that gradually slopes to a height of four feet four inches (4'-4") or less, in a front yard or front yard setback, erected parallel to the property line and does not constitute a traffic hazard.
 - H. The Zoning Administrator shall take into consideration the existing grade of the property as it affects the heights of the fence.
 - I. The property owner is solely responsible for making sure that the fence is placed upon their property and therefore should make every effort to locate the property markers. In addition, if the fence will require maintenance, the property owner making application shall make allowances in the setback so as not to need permission from the adjacent property owner for said maintenance.
 - J. For those fences, walls, plantings or hedges planted or installed prior to the passage of this section shall be allowed to remain until such time as the fence, wall, planting or hedge is in need of repair or becomes a hazard to the public.
- g) Visibility at Intersections: (EDITOR'S NOTE: Former subsection (g) was repealed by Ordinance 73-13.)
 - h) Setback Requirements for Corner Buildings. On a corner lot the principal building and its accessory structures shall be required to have the same setback distance from all street right-of-way lines as required for the front yard in the district in which such structures are located.
 - i) Yard Requirements for Multi-Family Dwellings. Multi-family dwellings shall be considered as one (1) building for the purpose of determining front, side, and rear yard requirements. The entire group as a unit shall require one (1) front, one (1) rear, and two (2) side yards as specified for dwellings in the appropriate district. Each individual building shall meet all yard requirements for the appropriate district as though it were on an individual lot.
 - j) Conversion of Dwellings. The conversion of any building into a dwelling, or the conversion of any dwelling in order to accommodate an increased number of dwelling units shall not be permitted unless:

- 1) The yard dimensions still meet the yard dimensions required by the zoning regulations for new structures in that district.
 - 2) The lot area per family equals the lot area requirements for new structures in that district.
 - 3) The floor area per dwelling unit is not reduced to less than that which is required for new construction in that district.
 - 4) The conversion is in compliance with all other relevant codes and ordinances.
- k) Trash Areas Required. All commercial, industrial, and multi-family residential uses shall provide a trash and/or garbage collection and pick-up area which shall be enclosed on at least three (3) sides by a solid wall or fence of at least five (5) feet in height if such area is not within an enclosed building or structure. Provisions for adequate vehicular access to and from such area or areas for collection of trash and/or garbage as determined by the Zoning Inspector shall be required.
- l) Side and Rear Yard Requirements for Nonresidential Uses Abutting Residential Properties. Nonresidential uses shall not be located nor conducted closer than forty (40) feet to any lot line of a residential property except that the minimum yard requirements may be reduced to fifty percent (50%) of the requirements if acceptable landscaping or screening approved by the Zoning Inspector is provided. Such screening shall be a masonry or solid fence between four (4) and eight (8) feet in height maintained in good condition and free of all advertising or other signs. Landscaping provided in lieu of such wall or fence shall consist of a strip of land not less than twenty (20) feet in width planted with an evergreen hedge or dense planting of evergreen shrubs not less than four (4) feet in height at the time of planting. Either type of screening shall not obscure traffic visibility within fifty (50) feet of an intersection.
- m) Accessory Structures in Residential Districts. No accessory structure(s) shall be erected in any required yard other than a rear or side yard, nor shall it occupy more than thirty percent (30%) of a required rear yard. A detached accessory structure may be located in the side yard setback except a side yard that abuts a street. Accessory structures shall not exceed fifteen (15) feet in height, unless a greater height is permitted by the Zoning Board of Appeals and shall be distant at least five (5) feet from all lot lines of adjoining lots which are in any residential district and ten (10) feet from any other structure on the same lot. On a corner lot in any residential district, an accessory structure shall be a distance from the side street lot line not less than the required front set back line.
- ~~Sheds may be located within one (1) foot of a property line if movable.~~ Dog pens shall be located five (5) feet from a property line and the owner of the animal shall cleanup the feces from the animal so that it does not become a nuisance to the adjoining property owners.
- n) Temporary Structures. Temporary structures, construction trailers, equipment, and materials used in conjunction with construction work only may be permitted in any district during the period construction work is in progress, but such temporary facilities shall be removed upon completion of the construction work. Storage of such facilities or equipment beyond the completion date of the project shall require a Zoning Certificate authorized by the Zoning Inspector.
- o) Architectural Projections. Open structures such as porches, canopies, balconies, platforms, carports, covered patios, and similar architectural projections shall be

considered parts of the building to which attached and shall not project into the required minimum front, side, or rear yard.

- p) Exceptions to Height Regulations. The height limitations contained in these regulations do not apply to spires, belfries, cupolas, antennas, water tanks, cooling towers, ventilators, chimneys, agricultural or other appurtenances usually required to be placed above the roof level and not intended for human occupancy.
- q) Agriculture. Nothing contained in this Zoning Ordinance shall prohibit the use of any land for agricultural purposes or the construction or use of buildings or structures incident to the agricultural use of the land where agricultural uses are permitted, but a Zoning Certificate shall be required for any such new building or structure.
- r) Essential Services. Essential services shall be permitted as authorized by law, it being the intention hereof to exempt essential services from the application of the Zoning Ordinance.

SECTION 2. That it is hereby found and determined that all formal actions of this Council concerning and relating to the passage of this ordinance were adopted in an open meeting of this Council and that all deliberations of this Council or any of its committees that resulted in such formal actions were in meetings open to the public, in compliance with all legal requirements including Section 121.22 of the Ohio Revised Code.

SECTION 3. That this Ordinance is not declared to be an emergency measure and shall take effect thirty (30) days after passage.

Passed this _____ day of _____, 2019.

President of Council
