ORDINANCE FOR FIRST READING: First reading of Ordinance #2016-12-05 (A) Amending Article 10.3.8 of the City of Conway Unified Development Ordinance (UDO) and Title 5, Chapter 2, of the City of Conway General Code of Ordinances to revise requirements for first floor building elevations in flood prone areas. Graham reported that, as a result of Hurricane Matthew in October 2016, several houses in Conway experienced flood levels higher than the building flood elevation requirements of the City. Current City regulations require that the first floor elevation of residential and non-residential structures be at least two feet above the base flood level or the highest flood elevations resulting from Hurricane Floyd in 1999. Houses that were permitted and built according to the current regulations, such as those in Jordan Estates, experienced several feet of water above the first floor elevation during Hurricane Matthew. The proposed ordinance would revise current regulations in UDO Section 10.3.8 and the City’s Flood Damage Prevention Ordinance (Title 5, Chapter 2) to require new construction, substantial damage and/or substantial improvement of structures currently required to meet flood prevention regulations in flood prone areas to be elevated at least two feet above the base flood level or two feet above Hurricane Matthew’s flood level, whichever is higher. Graham commented that a survey is underway to mark the highest flood elevations experienced during Hurricane Matthew. Graham also advised Council that approval of first reading would establish a pending ordinance that will allow immediate implementation of the new regulations. Staff recommended first reading approval. **Motion:** Goldfinch made a motion, seconded by Alford, to approve first reading of Ordinance #2016-12-05 (A). **Vote:** Unanimous. Motion carried.
