Town of Arlington
Design Review Committee Meeting

May 10, 2016
6:30 P.M.
AGENDA
Design Review Committee
Tuesday, May 10, 2016
6:30 p.m.

I. Call to Order & Establishment of a Quorum

II. Approval of the March 8, 2016 Meeting Minutes

III. Old Business
   A. Other as Properly Presented

IV. New Business
   A. Seasons Square PD (formerly known as High Pointe PD), Phase 1 – North side of Memphis-Arlington Road, West side of Airline Road – Site Plan
   B. Advanced Dermatology and Skin Care Center – Northwest corner or Milton Wilson Boulevard and Airline Road – Site Plan
   C. Other as Properly Presented

V. Adjourn
I. Call to Order and Roll:
   — Brian Thompson, Chairman
   — Phillip Fung, Secretary
   — Jeff McKee, Alderman
   — Ron Colin
   — Daniel Davidson
   — Josh Holtgrewe
   — Jennifer Walls

II. Approval of Minutes from the March 8, 2016, Meeting:
    
    **Main Motion:** 1st __________ — I move to approve the minutes from the March 8, 2016, DRC meeting as presented (or with corrections).
    2nd __________ (I second motion)

    Chair states results of vote:
    Carried: _____ Failed: _____

    Approve with the following corrections: ____________________________
I. Call to Order and Roll:

Chairman Brian Thompson called the meeting to order and advised that a quorum was established.

Present
Brian Thompson, Chairman
Phillip Fund, Secretary
Jeff McKee, Alderman
Ron Colin
Daniel Davidson
Josh Holtgrewe

Others Present
Angela Reeder, Town Planner
Hannah Taylor, Planning Clerk
Cathy Durant, Town Administrator
See list

II. Approval of Minutes from February 9, 2016 Meeting:

Motion: Daniel Davidson made a motion to approve the minutes of the February 9, 2016 meeting. Jeff McKee seconded the motion.

Vote on Motion: The motion carried unanimously.

III. Old Business:

A. Other as Properly Presented

There was no old business to come before the Committee.

IV. New Business:

A. Laboratory Express – Eastridge Business Park, Phase 1, Lot 2 – North side of Highway 64, West of the Fayette/Shelby County Line – Site Plan

Chairman Thompson recognized Angela Reeder, Town Planner, who provided an analysis (on file) and explained that this was a request for site plan approval for Laboratory Express on Lot 2 in the Eastridge Business Park. The 3.2-acre parcel is currently zoned M-1: Light Industrial and the proposed uses (office and laboratory) are permitted within the district. The proposed building includes approximately 8,000 square foot of office space with a 3,3000 square foot garage at the rear. The modern design elevations include a mixture of flat light gray flatlock wall panels, dark gray horizontal corrugated wall panels, gray splitface block, gray trex select edge boards, and windows. She reminded the committee that the Design Guidelines state that buildings within industrial zoned areas are allowed some flexibility with building materials. Given the location and modern design, the proposed metal materials on all sides could be considered acceptable. Several of the existing trees on site will be removed, with the exception of those on the west end of the site. A landscape plan was provided that was consistent with the requirements of the plat for the development. The lighting plan shows 25-foot tall parking lot pole fixtures and wall packs, all seeming appropriate for the site. Staff recommended approval of the site plan, subject to staff conditions and any additional conditions recommended by the DRC.
Main Motion: Daniel Davidson made a motion to approve the site plan for Laboratory Express, subject to Staff conditions and possible added DRC conditions. Jeff McKee seconded the motion.

Prior to discussion, Josh Holtgrew informed the committee that he acted as the electrical engineer for the project and was responsible for the photometric plan.

Brian Bullard of Urban Arch Associates explained that the modern design takes into account various textures and orientations of panels for visual interest. He stated that the light gray interlocking panels had very subtle seams without lacking texture. The Trex product will be used as a screening material along the front, as well as, for infill panels around the patio. The teak will be used inside of the building entry and overhang. Both staff and the committee recommended adding a condition that changed the color of the Trex material from gray to a wood finish that matched the teak proposed around the front door.

Mr. Bullard specified that Jerry Knauss, owner of Laboratory Express, did not intend to construct a ground mounted sign. He asked that the committee approve the reverse-channel, wall mount sign as on the rendering, but with a different font. Chairman Thompson informed Mr. Bullard that a sign application would be needed for the wall sign, but Ms. Reeder would approve it administratively.

Daniel Davidson pointed out that the plant schedule on the plans showed 134 puzzle grass, but the plans only showed 72. Lance Lanier of Ledford Engineering and Planning verified that some of the plants were not shown because they were in the inside of the patio/break room area.

Chairman Thompson called for further discussion, and, hearing none, he called for a vote on the main motion as amended.

Vote on Main Motion: The motion passed unanimously.

Conditions of Approval:
1. It is found that the application and plans dated March 1, 2016, along with the conditions of approval, meets the provisions of the Town of Arlington Zoning Ordinance and the Design Guidelines Manual. The project shall be constructed in accordance with all provisions of the Zoning Ordinance and Design Guidelines Manual.
2. Any approval shall be contingent upon the applicant satisfying all requirements/conditions of Site Plan approval levied by the Planning Commission.
3. All plans submitted to Shelby County for the issuance of a building permit shall be consistent with the plans approved by the Planning Commission and Design Review Committee. Any changes to the plan require prior approval by the Town of Arlington staff and/or appropriate Commission or Committee.
4. The site shall be maintained in accordance with the approved plans for the life of the project. Any revisions to the site or building require prior approval from the appropriate Board/Commission.
5. Irrigation for designated landscape areas is required. An irrigation plan shall be submitted to staff for consideration and approval prior to issuance of a building permit.
6. No application for signage has been presented. A separate application shall be presented to staff for consideration. All references on the plans to signage shall be disregarded. It is noted that signage shall conform to the requirements of the Arlington Zoning Ordinance.
7. Change the color of the trex select edge boards to a wood finish that matches the teak proposed around the front door.

B. Arlington Automotive – 5769 Airline Road – Site Plan for Ancillary Building

Chairman Thompson recognized Angela Reeder, Town Planner, who provided an analysis (on file) and explained that this was a request for site plan approval for an ancillary building for Arlington Automotive. This proposal will not add a new use to the 1.5-acre site, but rather allow for an expansion of the existing business. The 4,200 square foot accessory structure at the rear of the property will be used for seven (7) additional auto repair bays and storage space. The proposed building is centered on the lot behind the principal structure and is very similar in color and scheme. The new building includes a red brick exterior on all four (4) sides with two (2) bands of soldier course bricks on the top half of the
Design Review Committee
March 8, 2016
Page 3

wall. It will also have a standing seam Galvalume silver metal roof and white roll-up garage doors. Doors and windows will have bronze aluminum frames, and all gutters, downspouts, and trim will be painted red to match the proposed brick. The applicant has also agreed to add three (3) Willow Oaks at the rear of the lot behind the new building. The lighting and photometric plan identifies nine (9) LED wall packs around the perimeter of the new building; no parking lot pole fixtures have been proposed. Brian Sorenson, owner of Arlington Automotive, and Bill Fuller, architect for Mr. Sorenson, were both in attendance to answer any questions. Staff recommended approval of the site plan, subject to staff conditions and any additional conditions recommended by the DRC.

Main Motion: Ron Colin made a motion to approve the site plan for Arlington Automotive, subject to Staff conditions and possible added DRC conditions. Phillip Fung seconded the motion.

Chairman Thompson liked that the design and elevations of the ancillary building were consistent with the existing building on site, but questioned the color of the doors. Bill Fuller of 3255 Inglewood Place explained they proposed white doors specifically to match the primary building, but both he and Mr. Sorenson were open to other suggestions. Mr. Colin felt white doors popped too much, but other committee members were not concerned with the issue because the building would be less visible from Airline than the existing building. Mr. McKee suggested painting the doors bronze to match the frames around the windows and doors. Mr. Colin and Chairman Thompson agreed; Mr. Sorenson agreed to do bronze doors, even though he would like the buildings to match. He stated that the doors are up most of the time anyway, so the color change was not an issue. Mr. McKee suggested adding a condition to change the color of the roll-up bay doors on the building to a bronze that matches the proposed man doors.

Primary Amendment: Jeff McKee made a motion to add condition eight (8) to change the color of the roll-up bay doors on the building to a bronze that matches the proposed man doors. Josh Holtgrewe seconded the motion.

Vote on Primary Amendment: The motion passed unanimously.

Mr. Holtgrewe asked Mr. Sorenson if he had lighting on the rear of the existing building that would allow for some visibility between the two (2) buildings. Mr. Sorenson explained that he did have lights on the existing building, and would install parking lot pole fixtures if the lighting were insufficient. Chairman Thompson called for further discussion, and, hearing none, he called for a vote on the main motion as amended.

Vote on Main Motion as Amended: The motion passed unanimously.

Conditions of Approval:
1. It is found that the application and plans dated March 1, 2016, along with the conditions of approval, meets the provisions of the Town of Arlington Zoning Ordinance and the Design Guidelines Manual. The project shall be constructed in accordance with all provisions of the Zoning Ordinance and Design Guidelines Manual.
2. Any approval shall be contingent upon the applicant satisfying all requirements/conditions of Site Plan approval levied by the Planning Commission.
3. All plans submitted to Shelby County for the issuance of a building permit shall be consistent with the plans approved by the Planning Commission and Design Review Committee. Any changes to the plan require prior approval by the Town of Arlington staff and/or appropriate Commission or Committee.
4. The site shall be maintained in accordance with the approved plans for the life of the project. Any revisions to the site or building require prior approval from the appropriate Board/Commission.
5. Irrigation for designated landscape areas is required. An irrigation plan shall be submitted to staff for consideration and approval prior to issuance of a building permit.
6. All exterior lighting shall be dark bronze or a similar color to match the window framing and shall also be shielded in a manner as to not trespass onto adjacent properties per Town of Arlington Code requirements.
7. The three (3) new trees along the rear of the site shall be shifted outside of the 20’ wide public sanitary sewer easement required by the Planning Commission approval.

8. **Change the color of the roll-up bay doors on the new building to a bronze that matches the proposed man doors.**

C. **Kroger Marketplace – Airline Road PD, Phase 1, Lot 1 – Southeast corner of Milton Wilson Boulevard and Airline Road – Site Plan**

Chairman Thompson recognized Angela Reeder, Town Planner, who provided an analysis (on file) and explained that this was a request for site plan approval for the Kroger Marketplace building on a 15.78-acre parcel (Lot 1) within Phase 1 of the Airline Road PD. The Kroger building will include 123,000 square feet with a primary façade of approximately 460 feet wide, not including the pharmacy canopy. The building elevations include a modern design with dark, earth-tone base colors in a combination of decorative concrete brick masonry, fiber cement siding, pre-finished metal, and aluminum-framed storefront windows. The concrete brick will provide additional structural design and energy efficiency that a clay brick does not offer. The building is consistent with the approved Master Development Plan in building size, location, and style. Landscaping for the lot is included with the Site Plan application for the entire 24-acre site. All rooftop units will be screened by the building parapets, and any ground-mounted equipment and meters will be screened with landscaping or masonry walls. Baylor Bland, representative with CR Architecture and Design, and Cara Martin, engineer with Pickering Firm, Inc. were both in attendance to answer any questions the committee may have. Staff recommended approval of the site plan, subject to staff conditions and any additional conditions recommended by the DRC.

**Main Motion:** Phillip Fung made a motion to approve the site plan for Kroger Marketplace, subject to Staff conditions and possible added DRC conditions. Daniel Davidson seconded the motion.

Baylor Bland started by explaining the building materials and colors of the Kroger Marketplace building. Mr. McKee had an issue with the eight (8”) inch concrete ground-face blocks used as an accent on certain areas of the building. He felt it would look less like a standard concrete block if two (2) four (4”) inch blocks were used instead. Mr. Colin and Mr. Davidson disagreed and felt that, because of the size of the building, the block blended in well. Mr. McKee then suggested adding stone to the pillars on both the building and the fuel center for a more rustic feel. Mr. Bland stated that he will not design the fuel center, but the architect usually matches it to the building. The committee asked Staff to add a condition that required they review the proposed fuel center at a later date and that the materials be similar to the proposed Kroger building. Mr. Bland explained that he would be careful adding too many different types of materials to the building; the more materials there are, the harder it would be to blend things cohesively. Chairman Thompson and Mr. McKee understood Mr. Bland’s viewpoint; their biggest issue was, instead, the size of the block. Mr. Colin and Mr. Davidson again stated they saw no problem with the size of the block. Mr. Colin felt it added character, while Mr. Davidson felt that, because of the size of the building, a breakup was needed.

Mr. McKee then asked Mr. Bland if the railing in front of the café on the southwestern end of the building could follow the shape of the curb line. Mr. Bland explained that the railing does not come in a curved variety, but the posts could be placed to where it would have a curved look. Mr. McKee then asked if the patio could be larger than what was proposed. Mr. Bland stated that he could look into it, but he would need to make sure the shopping carts have room to get through. Chairman Thompson and Mr. McKee asked Mr. Bland if he could provide them with details of the tables, chairs, and umbrellas placed on the patio. Mr. Bland advised the committee that he would get provide Staff with those renderings at a later date. Conditions nine (9) and ten (10) were added to revise the railing and provide details to staff regarding the tables and chairs on the patio.

Mr. McKee asked the applicant whether the cart bays in the parking lot could be more decorative than the typical aluminum frame corral. Cara Martin, engineer on the project, explained that Kroger has a standard cart corral they use which happens to be aluminum-framed. Mr. McKee felt that the flimsy aluminum corrals made a development look unfinished. Chairman Thompson agreed and asked the
applicant to work with Staff to incorporate a more decorative corral that more closely matched the
design of the store.

Mr. Holtgrew asked the applicant to add a shield to the lights along the rear of the property. According
to Mr. Holtgrew, the shield would prevent light from bleeding onto the greenway trail at night, but
would allow workers, truck drivers, etc. some visibility when working around the building. He also
suggested incorporating a feature on the parking lot pole lights that would allow the lights to dim at
night during hours when the building was closed. Ms. Martin explained that the lights did have
dimming capabilities, but no details were provided on the cut sheets. A condition was added regarding
the light shield and the dimming feature.

Chairman Thompson called for further discussion, and, hearing none, he called for a vote on the main
motion with the added conditions.

**Vote on Main Motion:** The motion passed unanimously.

**Conditions of Approval:**

1. It is found that the application and plans dated March 1, 2016, along with the conditions of approval,
The project shall be constructed in accordance with all provisions of the Zoning Ordinance and Design
2. Any approval shall be contingent upon the applicant satisfying all requirements/conditions of Site
Plan approval levied by the Planning Commission.
3. All plans submitted to Shelby County for the issuance of a building permit shall be consistent with the
plans approved by the Planning Commission and Design Review Committee. Any changes to the plan
require prior approval by the Town of Arlington staff and/or appropriate Commission or Committee.
4. The site shall be maintained in accordance with the approved plans for the life of the project. Any
revisions to the site or building require prior approval from the appropriate Board/Commission.
5. Irrigation for designated landscape areas is required. An irrigation plan shall be submitted to staff for
consideration and approval prior to issuance of a building permit.
6. No application for signage has been presented. A separate application shall be presented to staff for
consideration. All references on the plans to signage shall be disregarded. It is noted that signage
shall conform to the requirements of the Arlington Zoning Ordinance, except where modified by a
Town approved Planned Development Permit and Master Development Plan.
7. Approval of the Kroger Marketplace building’s DRC review is contingent upon DRC approval of the
Site Plan improvements for Lot 1.
8. The proposed fuel center will have to return to DRC for review and approval at a later
date, and will be expected to incorporate materials from the Kroger building.
9. Revise the railing around the outdoor seating area to follow the adjacent curb line where
possible.
10. Provide a detail of the proposed patio tables and chairs for review and approval by Town
staff.
11. Revise the lights proposed at the rear of the Kroger building to one with shielding (like the
Airline Road and Milton Wilson proposed lights) to reduce light trespass on the Hall Creek
trail and further deter activity there.
12. Where available, incorporate a parking lot light feature that dims lights at night during
hours when the buildings are closed.
13. Provide a detail of the cart corrals proposed in front of Kroger for the review and approval
by Town staff. Incorporate a more decorative design more fitting of the quality of the
Kroger store than a typical aluminum frame corral.

**D. The Shops at Arlington – Airline Road PD, Phase 1 – Southeast corner of Milton Wilson Boulevard and
Airline Road – Site Plan for Entire Site and Lot 2**

Chairman Thompson recognized Angela Reeder, Town Planner, who provided an analysis (on file) and
explained that this was a request for site improvements for Lots 1 and 2, as well as the retail building on
Lot 2. The 19.64-acres within Phase 1 are currently zoned SC: Shopping Center and the proposed retail uses are permitted within the district. The proposed project includes a 26,400 square foot building for multi-tenant retail uses with the option to expand to 31,000 square feet. A revised elevation plan for the front of the building was provided to Staff after packets were delivered, but was given to the committee before the meeting for discussion. Building elevations show a four-sided dark, earth-tone brick design with aluminum-framed storefront windows along the entire front façade. A header and soldier course of bricks run along the roofline and metal eyebrow canopies cover all of the windows. The rear elevation includes multiple access doors, an 8-foot screen wall, and a dumpster enclosure in the center. A landscape plan was provided showing proposed landscape materials, quantities, species, and sizes; existing trees along Hall Creek will be saved and maintained where possible. The streetscape plan will provide a pattern of shade and flowering trees to soften the view of the Kroger parking lot and the fuel center. The parking lot islands throughout will further define the main drive and enhanced landscaping is proposed around the detention basin and the new public pedestrian trail along Hall Creek, which the developer will construct. Amenities include outdoor seating areas, bicycle storage areas, a pavilion, and a water fountain; outdoor dining areas are also encouraged. LED parking fixtures will be installed at 30-feet heights, with dark bronze steel poles on 2-foot bases. Ornamental LED wall sconces are also proposed along the front of the SHOPs building. All rooftop units will be screened by the building parapets, and any ground-mounted equipment and meters will be screened with landscaping or masonry walls. Daniel Fuller and Brad Terry with SHOP Companies were in attendance to answer any questions the committee may have. Staff recommended approval of the site plan, subject to staff conditions and any additional conditions recommended by the DRC.

Main Motion: Daniel Davidson made a motion to approve the site plan for the entire site and for lot 2 for The Shops at Arlington, subject to Staff conditions and possible added DRC conditions. Jeff McKee seconded the motion.

Although the committee liked the revised elevation plan better than what they were previously given, they still felt the building was lackluster. Mr. McKee thought the building had very little character compared to the modern Kroger next door. Chairman Thompson asked the applicant, Staff, and other committee members for suggestions on what could be done architecturally to make the building more appealing. Phillip Fung liked the idea of a different material for each tenant space, but he understood the concerns about tenants falling into weird spaces within the changes. Brad Terry, representative from SHOP Companies, explained that they added a glass front to break up each tenant space. They also added two (2) additional "pavilion" details increasing the total to four (4). He also pointed out the brick detailing along the building and the added features to the revised rendering. Mr. Colin suggested adding a taller, beffier cornice, but Mr. McKee was afraid that the building would still be bland even after that minimal change. Ms. Reeder and Mr. Fuller suggested that the committee only add changes that would have minimal impact on tenants, especially considering the tenant spaces are not currently under contract. Mr. Colin asked if they could add more mass at the corners and the center, but Mr. McKee still felt it was just going to be a long building with few elevation changes and no diverse façades or depths. Cathy Durant, Town Administrator, asked whether the applicant could show a small variation in the color of brick, but Mr. Terry was concerned with adding a different color brick that was not displayed on the Kroger building. SHOPs intent was to have a sleek modern building without getting into old world architecture. Mr. McKee pointed out the fact that Kroger has different materials incorporated in its building, so SHOPs needed to consider including additional materials. Daniel Fuller, another representative from SHOP Companies, asked the committee that when contemplating adding or changing materials to understand that SHOPs typically works with tenants wanting spaces under 2,000 sq. ft. Although it is likely that restaurants will be placed on either end of the building, their spaces will not exceed approximately 4,000 sq. ft. Changing certain features and or adding different materials could cause practical hardships when trying to place tenants in bays. Chairman Thompson and Mr. McKee continued to discuss the building elevations until Ms. Reeder suggested deferring them to a later meeting. Mr. Fuller and Mr. Terry both objected and explained that they would like to have everything approved as soon as possible. Chairman Thompson was afraid if they approved the elevations tonight then the committee would not have the opportunity to see the great things the architect could do with
their suggestions. Mr. Fuller asked the committee if he and Mr. Terry could step out and possibly come up with a solution to please them; everyone agreed.

Daniel Davidson liked the landscape plan, but felt there was too little color in the plantings. Blair Parker of Blair Parker Designs explained that he tried to use plants native to this region. Even though all of the landscaping will be irrigated, the goal was to slow the irrigation down by using plants that will easily be sustainable on their own. Mr. Parker also explained his thought process behind the trees and shrubs along the streetscapes, detention basin, and parking lot islands. Mr. Davidson agreed with many of Mr. Parker's choices, but had a hard time picturing the landscaping around the signage, since no application for signage was presented. Staff explained that a sign permit for each ground sign would be submitted and reviewed by the DRC at a later date. Mr. Davidson replied that, when the landscaping around those signs is designed, he would like to see more seasonal color incorporated. He also asked if Staff had any details on the bronze statue and the walking trail pavilion. Unfortunately, neither Staff nor the applicant had details on either, so a condition was added for the applicant work with Staff on the landscaping around both. Mr. Davidson also asked that Staff add a condition to provide larger Needlepoint Holly specimens if site spacing indicates that the currently proposed sizes are too small.

According to Josh Holtgrewe, it is hard to determine whether the sconces would be an appropriate size for the building, so he asked Staff to verify that the proposed size is scaled appropriately to the size of the building. He also asked that the condition regarding the dimming feature on parking lot lights be added.

Chairman Thompson asked Ms. Reeder if she could give the committee some details on the crosswalks within the development. Ms. Reeder pointed out the locations of crosswalks and explained that the material was called out for all of the crosswalks except the large ones in front of the entrances at Kroger. Generally, it would be painted with yellow or white stripes, which is not ideal, so Ms. Reeder has been working with the applicant on other possible solutions. Cara Martin and Blair Baylor, representatives for Kroger, both explained some of the hazards with using a material other than asphalt. The committee asked the applicant to work with staff to determine a more decorative system of marking the crosswalks between the Kroger and handicap parking area than standard painted lines on asphalt.

Mr. Fuller and Mr. Terry brought forward a change to the SHOPs building that they hoped would satisfy the committee. The hand drawn renovation of the original plan showed added parapet variations, which the committee liked. They also raised the height of the tower elements on either end and in the middle of the Shops A and B building and included a larger cornice with cast stone elements to emphasize those areas. The committee asked that Staff add a condition to incorporate the changes made in the said revision.

Chairman Thompson called for further discussion, and, hearing none, he called for a vote on the main motion with the added conditions.

**Vote on Main Motion:** The motion passed unanimously.

**Conditions of Approval:**

1. It is found that the application and plans dated March 1, 2016, along with the conditions of approval, meets the provisions of the Town of Arlington Zoning Ordinance and the Design Guidelines Manual. The project shall be constructed in accordance with all provisions of the Zoning Ordinance and Design Guidelines Manual.
2. Any approval shall be contingent upon the applicant satisfying all requirements/conditions of Site Plan approval levied by the Planning Commission.
3. All plans submitted to Shelby County for the issuance of a building permit shall be consistent with the plans approved by the Planning Commission and Design Review Committee. Any changes to the plan require prior approval by the Town of Arlington staff and/or appropriate Commission or Committee.
4. The site shall be maintained in accordance with the approved plans for the life of the project. Any revisions to the site or building require prior approval from the appropriate Board/Commission.
5. Irrigation for designated landscape areas is required. An irrigation plan shall be submitted to staff for consideration and approval prior to issuance of a building permit.
6. No application for signage has been presented. A separate application shall be presented to staff for consideration. All references on the plans to signage shall be disregarded. Signage shall conform to the requirements of the Arlington Zoning Ordinance and any deviations approved with the Master Development Plan for the site.

7. Provide a detail of the proposed landscaping around the walking trail pavilion and bronze statue for review and approval by Town staff.

8. Provide larger Needlepoint Holly specimens if site spacing indicates the currently proposed sizes are too small.

9. Verify that the proposed size of the decorative wall sconces along the front of Shops A and B is scaled appropriately to the size of the building.

10. Where available, incorporate a parking lot light feature that dims lights at night during hours when the buildings are closed.

11. Work with staff to determine a more decorative system of marking the crosswalks between the Kroger and handicap parking area than standard painted lines on asphalt.

12. Incorporate the added parapet variations from the 3/7/16 revision, and raise the height of the tower elements on either end and in the middle of the Shops A and B building and include a larger cornice with cast stone elements to emphasize those areas.

E. Other as Properly Presented

There was no new business to come before the Committee.

V. Adjournment:

Chairman Thompson called for a motion to adjourn.

Motion: Phillip Fung made a motion to adjourn. Daniel Davidson seconded the motion.

The meeting adjourned at approximately 9:53 pm.

   *Note: Vote on Secondary Amendment first, then Primary Amendment and last the Main Motion*
DATE: May 10, 2016

STAFF: Angela Reeder, AICP, Town Planner

SUBJECT: Site Plan Review

APPLICANT: A.I. Guron

DESIGN PROF./CONSULTANT: Ledford Engineering & Planning; Representative: Kevin Ledford

SITE LOCATION: North Side of Memphis-Arlington Road, West of Airline Road

SITE ACREAGE: 1.26 Acres

ZONING: SC: Shopping Center with a PD Overlay (High Pointe PD)

PROPOSAL: Mr. A.I. Guron is requesting DRC approval of a site plan for Phase 1 of the Seasons Square Planned Development (previously High Pointe), located on the north side of Memphis-Arlington Road, just west of Airline Road. The 1.26 acre subject property is currently undeveloped and is located in the SC: Shopping Center Zoning District.

The High Pointe PD Overlay was approved by the Board of Mayor and Aldermen on September 8, 2015 (Resolution 2015-35). The Planning Commission approved the Site Plan for Phase 1 on November 16, 2015.

Building Elevations: Phase 1 includes a 6,913 square foot multi-tenant building including a convenience store, as well as gasoline pumps and canopy, and associated parking. The buildings elevations include a mixture of brick, rocked masonry units, various metal canopies, and windows.

The primary material on all four (4) elevations is the Forrest Glen brick, which is a varied brown color. A soldier course of bricks is proposed along the roofline and also just above the windows at ceiling height. The brick is proposed with two variations in mortar, one with matching mortar and one with beige, to give an appearance of shadow or of different storefronts. The base along the front and sides of the building is highlighted with a gray ‘rocked masonry unit’ with a cast stone cap. The block is a cast stone product by Arriscraft made of calcium silicate and containing no Portland cement.
Multiple entry doors and windows line the front and sides of the building. The door and window framing is finished in bronze, which matches the multiple eyebrow canopies and awnings found lining the walls.

The gas pump canopy will mirror the building, with Forest Glen brick columns set on stone bases. The canopy itself will have a crown molding design with the appearance of stone. It will match color with the rocked stone base. The canopy material is not identified at this point, but will likely be EIFS or a similar product due to the weight considerations for this type of structure.

**Landscaping, Irrigation and Tree Ordinance:** A landscape plan has been provided showing the site landscaped with a mixture of evergreen and deciduous materials. The site requires a minimum of 25 tree density units be planted on site, and the applicant has proposed 40 tree density units.

Crepe Myrtles are proposed in the streetscape plantings along Memphis-Arlington Road and along the west property line in front of the building. Cypress trees are proposed directly behind the building to provide some screening for that area. In addition, a few Magnolia, Dogwood and October Glory Maples are scattered throughout the site. Foundation plantings include white Azaleas, Daylilies, Indian Hawthorn, and boxwood. Lastly, Junipers are proposed as screening around the trash enclosure.

The sidewalk around the buildings is proposed with several colored, stamped patterned inlays to provide additional interest, as well as two 4-foot diameter planters to add seasonal color.

An irrigation plan will be required to be submitted to staff prior to the issuance of a building permit. A condition of approval has been added.

**Exterior Lighting and Photometric Plan:** The lighting plan shows decorative poles and light fixtures in a dark bronze finish throughout the site. Post top or acorn fixtures are proposed on the sidewalk around the perimeter of the building. The LED lights in these fixtures have shielding on the top and include down lighting optics to help direct the light.

In the parking lot, similar decorative posts are proposed with ornamental downlight fixtures and include both single and double light poles. These lights are in the same dark bronze finish and will direct the LED lights down toward the parking lot. Lastly, wallpacks are also proposed at the back of the site around the rear doors. The proposed lighting intensity seems appropriate for the site and includes minimal light trespass onto adjacent properties.

**Garbage Collection Areas:** The trash enclosure will be located on the northwest side of the site. The enclosure is proposed to be finished in a brick to match the building with black metal gates on metal supports. Staff recommends the metal be a bronze finish to match the other metal elements on site.

**Mechanical Units and Meters, Transformers, Rooftop Units:** All rooftop units will be screened by the parapet. Any ground-mounted equipment and meters will be screened with a brick walls along the rear of the building, or by landscaping elsewhere, unless required to maintain visibility and access.

**Signage:** No application for the noted ground mount sign has been presented. A separate application shall be presented to staff for consideration of the sign and associated landscaping.
Next Steps: If approved, the applicant will next be required to complete all conditions of approval and have a Pre-Construction meeting with staff prior to beginning work.

RECOMMENDATION:
Staff recommends approval of the proposed Seasons Square PD, Phase I Site Plan, subject to the following conditions and any additional conditions recommended by the Design Review Committee:

CONDITIONS OF APPROVAL:
1. It is found that the DRC application and plans dated May 4, 2016, along with the conditions of approval, meets the provisions of the Town of Arlington Zoning Ordinance and the Design Guidelines Manual. The project shall be constructed in accordance with all provisions of the Zoning Ordinance and Design Guidelines Manual.

2. Any approval shall be contingent upon the applicant satisfying all requirements/conditions of Site Plan approval levied by the Planning Commission.

3. All plans submitted to Shelby County for the issuance of a building permit shall be consistent with the plans approved by the Planning Commission and Design Review Committee. Any changes to the plan require prior approval by the Town of Arlington staff and/or appropriate Commission or Committee.

4. The site shall be maintained in accordance with the approved plans for the life of the project. Any revisions to the site or building require prior approval from the appropriate Board/Commission.

5. No application for signage has been presented. A separate application shall be presented to staff for consideration. All references on the plans to signage shall be disregarded. It is noted that signage shall conform to the requirements of the Arlington Zoning Ordinance.

6. Prior to the issuance of a building permit, the applicant shall address the following conditions and make any necessary amendments to the plans. The amended plans are to be submitted to staff for consideration and approval.
   a. Irrigation for designated landscape areas is required. An irrigation plan shall be submitted to Staff for review and approval prior to issuance of a building permit.
   b. Revise the metal doors on the trash enclosure to a bronze or brown finish, instead of the proposed black, to coordinate with other metal accents on the building.
   c. Provide a cut sheet for wall sconces proposed on the building front consistent with renderings.

Note: Vote on Secondary Amendment first, then Primary Amendment and last the Main Motion
Advanced Dermatology Clinic  
Site Plan Review

DATE: May 10, 2016

STAFF: Angela Reeder, AICP, Town Planner

SUBJECT: Site Plan Review

APPLICANT: D & P Investments; Representative: Purvisha Patel

DESIGN PROF./CONSULTANT: Ledford Engineering & Planning; Representative: Kevin Ledford

SITE LOCATION: Northwest corner of Milton Wilson Boulevard and Airline Road

SITE ACREAGE: 1.41 Acres

ZONING: SC: Shopping Center District

PROPOSAL: Ledford Engineering and Planning, on behalf of Dr. Purvisha Patel, is requesting DRC approval of a site plan for a dermatology medical clinic to be located at the northwest corner of Milton Wilson Boulevard and Airline Road. The subject property is currently undeveloped and is located in the SC: Shopping Center Zoning District.

The applicant proposes a single-story, 14,144 square foot medical office building on the 1.4 acre lot. The building will be situated along the Airline Road street frontage, with parking on the north and west sides of the building. Access to the site will be via a driveway on Airline Road at the northeast corner of the site, as well as a shared ingress/egress easement onto Milton Wilson Boulevard from the adjacent property to the west.

The Planning Commission approved the site plan for the project on February 16, 2016.

Building Elevations: The proposed office building will be predominantly brick on all four elevations. The brick includes a medium gray color and lighter buff color. To frame the building, a base of buff (champagne) rocked masonry unit is provided around the entire building and a similar buff colored EIFS cornice is proposed at the roofline. The rocked masonry unit is a cast stone block (calcium silicate containing no Portland cement). Stone pilasters are provided along the façade of all four elevations. While no material sample was provided, in the renderings the stone appears to match the lighter colored brick.
The walls are broken up with evenly spaced windows, each highlighted with a beige keystone above it. The window and door framing systems are proposed to be silver aluminum, to blend with the light colors of the building and proposed silver lighting sconces. A large covered patio is proposed at the primary entrance on the west elevation, and a smaller, 8-foot wide eyebrow canopy is proposed on the east elevation facing Airline Road.

**Landscaping, Irrigation and Tree Ordinance:** A landscape plan has been provided showing a heavily landscaped site with a mixture of evergreen and deciduous materials throughout the site. The site requires a minimum of 28 tree density units be planted on site, yet the applicant has proposed 97.5 tree density units (total of 43 trees proposed).

Streetscape plantings in along Airline Road include alternating Crepe Myrtles and Pin Oaks, spaced at maximum 30’ OC, as required by the Design Guidelines. The perimeter of the parking lot is ringed with alternating October Glory Maples and Tulip Poplars. Foundation plantings include Boxwood, Holly and Dwarf Japanese Maples. Lastly, Emerald Green hedges are proposed as screening around the trash enclosure.

An irrigation plan will be required to be submitted to staff prior to the issuance of a building permit. A condition of approval has been added.

**Exterior Lighting and Photometric Plan:** The lighting plan shows four (4) LED parking lot pole fixtures installed at 25 feet, on 2-foot bases. In addition, approximately 30 decorative wall-mount light fixtures are proposed around the building. All of the lights are proposed in “natural aluminum” and silver finishes consistent with other metal fixtures on the building.

The lighting intensity of the wall sconces seems appropriate to light the building face, and should not spill outside the property. However, the photometric plan shows the parking lot fixtures will bleed light onto adjacent property to the west and north. A condition of approval has been added to require appropriate shielding on these lights to reduce light trespass.

**Garbage Collection Areas:** A trash enclosure will be located on the northwest side of the site. While not shown on the plans, a condition of approval is added that requires the applicant to provide a brick enclosure to match the building with gates on metal supports.

**Mechanical Units and Meters, Transformers, Rooftop Units:** All rooftop units will be screened with the parapet. Any ground-mounted equipment and meters will be screened with landscaping, unless screening has to be restricted to maintain visibility and access.

**Signage:** No application for signage has been presented. A separate application shall be presented to staff for consideration at a later date.

**Next Steps:** If approved, the applicant will next be required to receive a Development Agreement from the BMA, and have a Pre-Construction meeting with staff prior to beginning work.

**ANALYSIS:** The building includes several elements required by Town Design Guidelines, quality materials, a defined base and cap, pilasters and roofline variations to break up the mass of the building. Staff is concerned that the lighter building materials are so similar that they may be muted and not
provide the interest the Town desires. The applicant has been asked to provide material samples at the DRC meeting and staff recommends a condition of approval be added to revise the brick color, if material samples do not demonstrate the variation desired.

Lastly, per Town guidance, the applicant placed the building along the street at their front setback with parking at the rear. However, a medical office is a use where people would not normally arrive by foot, and therefore use of the street side entrance is limited. Nevertheless, this is a very visible intersection coming into Town. In addition, Design Guidelines state building facades visible from a public road should be finished in a manner consistent with the front façade.

In response to these concerns, the applicant carried the same materials and design around all sides of the building, provided a small cantilevered patio cover and enhanced landscaping along the street. Staff feels additional revisions may be required, and recommends the east facade along Airline Road be revised in a manner similar to the west entrance. By providing two shorter pilasters in the center and a wider canopy above the door, it should provide a more pedestrian scale in keeping with a building entrance.

RECOMMENDATION:
Staff recommends additional review of building materials provided by the applicant at the meeting, and that any approval of the proposed Dermatology Clinic Site Plan be subject to the following conditions and any additional conditions recommended by the Design Review Committee:

CONDITIONS OF APPROVAL:
1. It is found that the application and DRC plans dated May 4, 2016, along with the conditions of approval, meets the provisions of the Town of Arlington Zoning Ordinance and the Design Guidelines Manual. The project shall be constructed in accordance with all provisions of the Zoning Ordinance and Design Guidelines Manual.

2. Any approval shall be contingent upon the applicant satisfying all requirements/conditions of Site Plan approval levied by the Planning Commission.

3. All plans submitted to Shelby County for the issuance of a building permit shall be consistent with the plans approved by the Planning Commission and Design Review Committee. Any changes to the plan require prior approval by the Town of Arlington staff and/or appropriate Commission or Committee.

4. The site shall be maintained in accordance with the approved plans for the life of the project. Any revisions to the site or building require prior approval from the appropriate Board/Commission.

5. No application for signage has been presented. A separate application shall be presented to staff for consideration. Any references on the plans to signage shall be disregarded. It is noted that signage shall conform to the requirements of the Arlington Zoning Ordinance.

6. Prior to the issuance of a building permit, the applicant shall address the following conditions and make any necessary amendments to the plans. The amended plans are to be submitted to staff for consideration and approval.

   a. Irrigation for designated landscape areas is required. An irrigation plan shall be submitted to Staff for review and approval prior to issuance of a building permit.
b. Appropriate shielding shall be provided on the parking lot fixtures to ensure that no light trespass onto adjacent properties or Airline Road will occur.

c. Provide a detail of the proposed trash enclosure for review and approval by Staff. The enclosure shall be constructed of brick to match the building with solid gates on metal supports.

d. Revise the east facade along Airline Road in a manner similar to the west entrance, to include a wider canopy above the door with two shorter pilasters in the center to give a more pedestrian scale.
**Design Review Committee**
