Important Notice

Over the next few weeks, the City of Cedar Rapids will be studying where groundwater and stormwater may be entering the sanitary sewer. As part of this study, we are asking you to let representatives from the City of Cedar Rapids and HDR Engineering, Inc. enter your home to investigate your home’s sewer and drainage connections.

Crews will be knocking on doors in your neighborhood on:

- Saturday, 11/4, 9 a.m. to 1 p.m.
- Saturday, 11/11, 9 a.m. to 1 p.m.
- Saturday, 11/18, 9 a.m. to 1 p.m.
- Tuesday, 11/21, 4 p.m. to 8 p.m.
- Monday, 11/27, 4 p.m. to 8 p.m.
- Saturday, 12/2, 9 a.m. to 1 p.m.

What happens if the City finds something wrong?

If your sump pump is connected to the sanitary sewer, a contractor hired by the City will disconnect the illegal connection at NO COST to you. This can save you as much as $1,500.

**PLEASE NOTE:** This disconnection program is currently voluntary and there are no penalties or fees for property owners who require disconnections; however, in the future, the City may need to implement fees or surcharges for illegal connections.

We strongly recommend that you participate now and ensure any improper sump pump connections are fixed at the City’s cost.
Why are we examining your home?
The City of Cedar Rapids is addressing a problem with excess water entering the sanitary sewer system, which overwhelms the capacity of the system leading to basement back-ups for residents and sewer overflows. The goal is to identify areas where stormwater and groundwater are entering the sanitary sewer system, so we can plan repairs to improve the system.

What to Expect:
- A chance to share any problems you are having with sewer service in your area
- Crews will examine drains and sump pumps inside the home
- Crews will examine drainage outside the home
- Crews will work as efficiently as possible to minimize the disruption to your day

Questions?
If you have any questions about this study, please email sewer@cedar-rapids.org or call 319-286-5802.
