VAZO Legal training sessions keep area staff members current on Virginia State Code requirements and any changes as they relate to both the BZA and to the Planning Commission.
3.0 BUILDING INSPECTIONS DIVISION

The Building Inspections Division is comprised of a staff of eight: three Combination Inspectors, one Residential Plans Examiner, two Permit Technicians, an Office Manager and a Building Official.

The Building Inspections Division is responsible for issuing permits, and conducting inspections for all new construction, alterations and repairs to existing structures, removal or demolition of structures and other building operations to ensure that the proposed construction will comply with the provisions of the Virginia Uniform Statewide Building Code. The Virginia Uniform Statewide Building Code is a minimum standard for construction applicable to all jurisdictions within the Commonwealth of Virginia. The Inspections staff works closely with property owners, developers, architects, engineers and all other parties involved in construction projects from the conceptual phase of the project through construction and completion of the project.

Issuing building permits is the means to accomplish the goals of the building code; namely, to establish minimum requirements to safeguard the public health, safety, and general welfare from fire and other hazards in the built environment. Building code compliance enforcement is comprised of education, plan reviews, permit administration, inspections and enforcement of code requirements. Plan reviews are used to verify that submitted building plans comply with the requirements of the code. Building inspections are necessary to verify the intent of the code and the requirements of the reviewed/approved plans are carried out on site. The types of required inspections vary with the type of project being completed. The total number of inspections also varies with the project type, the complexity of the project, and the number of re-inspections required due to correction orders issued.

Inspections staff regularly fields complaints regarding nuisances such as discarded materials, tall grass, outdoor storage, housing conditions, and problems with the condition of rental units. Inspections staff work closely with the Zoning staff and the Police Department to achieve compliance with the Virginia Maintenance Code and the Code of the County of Prince George.

The Building Inspections Division also enforces the provisions of the Statewide Fire Protection Code, based upon receiving documented complaints of violations.
